Atlanta, Georgia 30303

Dear Mr. Moseley:

H. B. ROBINSON STEAM ELECTRIC PLANT

DOCKET NO. 50-261

LICENSE NO. DPR-23

ANNUAL ENVIRONMENTAL RADIOLOGICAL MONITORING REPORT

Attached you will find a report on the Environmental Radiological Monitoring Program required by Appendix B, Section C, of the H. B. Robinson Environmental Technical Specifications. Our recent review of these specifications indicates that there are no reporting requirements for the Environmental Radiological Monitoring Program. Therefore, we are preparing recommended changes to the specifications which specify an annual report to be due within 90 days of January 1 of each year. This follows guidelines set forth in both Regulatory Guide 4.8 and the proposed Environmental Technical Specifications for the H. B. Robinson Plant.

The report now being submitted summarizes the Environmental Radiological Monitoring Program for the entire year of 1976, and we will continue these reports on an annual basis.

You will also find a change in the format of the present report which now is chiefly comprised of a summary table and related interpretation. This format was chosen since it follows the reporting methods outlined in Regulatory Guide 4.8 and our own proposed Environmental Technical Specifications for the H. B. Robinson Plant.

Yours very truly,

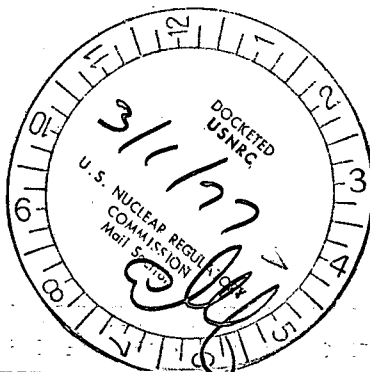

*H. R. Banks*
