RE: H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2
DOCKET NO. 50-261

Dear Mr. Reid:

On July 15, 1977 you transmitted to Carolina Power & Light Company (CP&L) a request for information on the routine discharge of residual chlorine. You indicated that this information would be useful (to the NRC) in determining whether there is any environmental impact related to various methods of chlorine usage, and in achieving your goal of minimum regulation regarding Environmental Technical Specifications (ETS).

Regulation of non-radiological liquid effluents is governed by National Pollutant Discharge Elimination System (NPDES) permits. The chlorine discharge limitations contained in the NPDES permits are established by the U. S. Environmental Protection Agency or, in the case of Permitting States, by the individual state agency; and justification of such limitations rests with those agencies. Thus, we believe providing chlorination data for our Robinson Plant for use in the development of Environmental Technical Specifications would not represent a wise use of resources, and would encourage the very sort of duplication of effort that Congress stated (in §101(f) of the Federal Water Pollution Control Act) it is the national policy to discourage.

Yours very truly,

A handwritten signature in cursive script, appearing to read "B. J. Furr".
