

August 20, 2014

Mr. Ralph Hill, Vice President  
Nuclear Codes and Standards  
American Society of Mechanical Engineers  
9037 Firebird Drive  
Las Vegas, NV 89134-8503

SUBJECT: Request for Revision to Regulatory Guides, NUREG-0800, and 10 CFR 50.55a that Reference ASME Nuclear Codes and Standards

Dear Mr. Hill:

This is to acknowledge my receipt of your letter of July 21, 2014, requesting revision to several Regulatory Guides, NUREG-0800, and 10 CFR 50.55a. Thank you for bringing to my attention these references to ASME Nuclear Codes and Standards that could be updated.

My staff is currently reviewing the documents cited in your letter. We will be responding soon with the planned review and update schedules for these documents. Your request to revise 10 CFR 50.55a will be treated as a petition for rulemaking, which follows a different, structured process that is administered by NRC's Office of Administration.

Thank you again for informing me of these concerns on behalf of ASME Nuclear Codes and Standards. I hope to discuss this topic further with you this month at the ASME – NRC management meeting, currently scheduled for August 22, 2014.

Sincerely,

**/RA/ M. Case**

Michael J. Case, Director  
NRC Standards Executive  
Office of Nuclear Regulatory Research
