**Permit to Mine 633, Smith Ranch – Highland Uranium Project,
2013-2014 Annual Report
Cameco Resources**

Dear Mr. Rogaczewski:

Enclosed please find two (2) copied sets of Power Resources, Inc. d/b/a/ Cameco Resources (Cameco) 2013-2014 Annual Report for Permit 633, Smith Ranch – Highland Uranium Project. The report addresses applicable reporting requirements of the approved permit application, WDEQ In Situ Annual Report Format contained in Guideline 4 Reference Document 1- Attachment IX, and W.S. 35-11-411. Electronic copies (2) are also provided with the submittal.

Previous annual report submittals were two separate reports for Permits 633 and 603. With the Combination Permit/Reynolds Ranch Amendment approval, dated March 10, 2014, the 2014-2015 Annual Report content is addressed as one permit, Permit 633, and contains all the information associated with the combined mine site.

The content contained in the annual report is oriented to meet the In Situ Annual Report Format (ISARF) requirements outlined in the Guideline 4 Reference Document 1- Attachment IX. The Operations Plan in Permit 633 lists requirements for the annual report different from the ISARF. Information included in the 2014-2015 Annual Report but not required in the ISARF are as follows:

- Annual site meteorological data summary

This information will not be carried forward in future annual reports but may be made available on site for review.

Additionally, information described in Section 12.3 of the approved operations plan but not included in the 2014-2015 Annual Report is as follows:

- Maps showing all ASCM/BMPs for erosion and sedimentation control
- Index of Change to insert on permit drilling activities into Appendix D5

This information does not fit the purposes or meet regulatory requirements intended for the annual report. A proposal to revise Section 12.3 of Permit 633 Operations Plan will be discussed with LQD for consideration.

Please contact me at 307-358-6541, ext. 476 or email to Kenneth_Garoutte@cameco.com if you have any questions.

Respectfully,

Ken Garoutte
Manager of Safety, Health, Environment, Quality (SHEQ)
