Subject: Verbal Notification of release on permit 633, 8/19/14.

This email is to document that verbal notification or voice mail was given to your office on 8-19-14 of a reportable release on Permit 633, NRC Source Material License SUA-1548. The release happened on Tuesday, 8-19-14 at approximately 8:15 am. The data reported was as follows;

- Location: Wellfield K, near Header House K-1.
- Fluid release estimated at 9074 gallons of injection fluid onto the ground surface. Fluid did not enter waters of the state. A sample for uranium content showed 2.7 ppm.
- Cause: Trunkline failure. Main valves were closed to stop the release. The nature of the failure is to be determined

The WDEQ-Emergency Response Coordinator (Joe Hunter) was given verbal notification and a report has been filed with the WQD spill database.

A written notification will be sent out on or before Tuesday August 26, 2014.

Please reply or call if more information is needed.
