

SUBJECT: 2012 Exempt Distribution Transfer Report for MS Sedco, Inc. (13-26301-02E)

US Nuclear Regulatory Commission
Director of the Office of Federal and State Materials and
Environmental Management Programs
ATTN: Document Control Desk/Exempt Distribution
Washington DC 20555-0001

August 8, 2014

As per 10 CFR 32.14, we are required to submit a report detailing product transferred to other persons from our facility every year. Therefore please let this letter serve as our report by noting the following information:

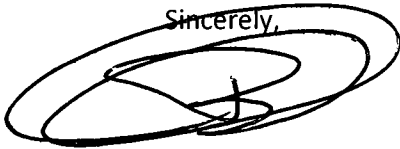

These products are transferred for use under 10CFR 30.15.

All units transferred from our facility which contain byproduct material have been in the form of a finished product. This product is a Smoke Detector with Integral Door Holder/Release Mechanism. It is an NRC Registered Device (# NR-782-D-101-E) and contains 0.9uCi of Americium-241.

The total number of units shipped from 01-01-2012 through 12-31-2012 is 480 pieces. The total amount of Americium-241 would therefore be $(480 \times 0.9\text{uCi}) = 432\text{uCi}$.

We trust you will find the enclosed information adequate for the intended purpose. If you need any additional information, you may contact me at (317) 842-2545.

Sincerely,

A handwritten signature in black ink, appearing to be "Brian Christopher", enclosed within a large, loopy oval shape.

Brian Christopher
Radiation Safety Officer
