NUCLEAR REGULATORY COMMISSION**
REGION I
2100 RENAISSANCE BOULEVARD, SUITE 100
KING OF PRUSSIA, PA 19406-2713

August 20, 2014

Docket No. 03038756
Control No. 584338

License No. 47-35159-01

Scott A. Shaver
Vice President
Energy Surveys, Inc.
418 Mayo Street
Clarksburg, WV 26301

SUBJECT: ENERGY SURVEYS, INC., NEW LICENSE, CONTROL NO. 584338

Dear Mr. Shaver:

This refers to your application dated July 10, 2014, for an NRC license. Enclosed with this letter is the license. Your license authorizes possession and use of two Troxler Model 3400 Series portable gauges. You must request and receive an amendment to your license prior to acquiring additional gauges or any model(s) other than those specified in Item 9 of your license. Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

Please note that NRC policy requires that all correspondence related to a license be signed by a member of the licensee's senior management, rather than the Radiation Safety Officer or a consultant. Your adherence to this policy in all your future correspondence with us will assist us in processing the correspondence in a timely manner.

The NRC is required to have your Taxpayer Identification Number in order to make payments (refunds). Please complete the enclosed NRC Form 531, "Request for Taxpayer Identification Number" and mail to the address at the bottom of the form (Note 5).

The NRC expects licensees to conduct their programs with meticulous attention to detail and high standards of safety and compliance. Serious consequences to employees and the public can result from failure to comply with NRC requirements, therefore you must conduct your program according to NRC regulations, the conditions of your NRC license, and the representations made in your application.

NRC regulations require that you notify the NRC, promptly, in writing of:

1. any change in your mailing address;
2. when you decide to terminate all activities involving materials authorized under the license or if you decide not to acquire or possess and use authorized material; or
3. when the Radiation Safety Officer named on the license leaves your company.

NRC regulations also require that you request and receive an amendment to your license prior to:

1. acquiring licensed material in excess of the maximum possession limits specified in Item 8 of your license;
2. adding or changing the areas of use, or addresses of use identified in the license application or on the license; or
3. changing the name or ownership of your organization.

You will be periodically inspected by the NRC. Failure to conduct your program safely and in accordance with NRC regulations, license conditions, and the representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, imposition of a civil penalty, or an order suspending, modifying or revoking your license.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits**, see our **toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

Thank you for your cooperation.

Sincerely,

Original signed by Sattar Lodhi
