U.S. ATOMIC ENERGY COMMISSION

MAIL CONTROL FORM FORM AEC-3265 (8-60)

Carolina Power & Light Company

50-261

Raleigh, North Carolina 27602

August 23, 1971

Dr. Peter A. Morris
Division of Reactor Licensing
U. S. Atomic Energy Commission
Washington, D. C. 20545

H. B. ROBINSON PLANT
FACILITY LICENSE NO. DPR-23

Dear Dr. Morris:

A change to the Technical Specifications for H. B. Robinson Unit No. 2 is requested to clarify the definition of Rated Power. Specifically, it is requested that the definition in Paragraph 1.1 of the Technical Specifications be amended to read as follows:

1.1 Rated Power

A steady state nuclear steam supply output (reactor core thermal power) of 2200 MWt.

It is believed that this change would clarify the language in the Technical Specifications and better describe the intent of the rated power definition. The intent of the license, in the opinion of Carolina Power & Light Company, was to authorize a reactor core thermal power of 2200 MWt exclusive of any heat contribution to the nuclear steam supply by main coolant pumps.

Yours very truly,

E. E. Utley
Manager

Generation & System Operations
