Re: Docket No. 50-261

Dear Dr. Morris:

Carolina Power & Light Company herewith transmits 50 copies of the "Containment Design Report," August, 1969, for our H. B. Robinson Unit 2. The additional information in this report is to be used in support of the design of our containment.

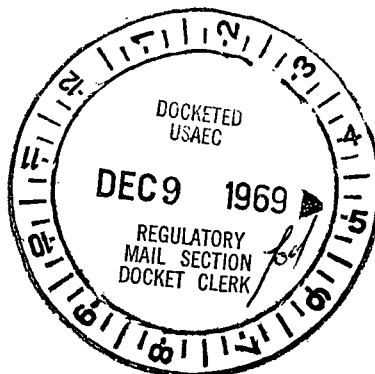

There is one technical error in this report. On Page 3-17 the description of the temperature monitoring of piping penetrations is incorrect. The penetration cooling water system is correctly described in Amendment #3 to the FSAR, Tab VII, Response III-A-10.

Yours very truly,

P. S. Colby  
Senior Vice President

Mr. P. S. Colby, Vice President  
Operating & Engineering Department  
Carolina Power & Light Company  
Post Office Box 1551  
Raleigh, North Carolina 27602

Attention: Mr. Larry Smith

Dear Mr. Smith:

Subject: Carolina Power & Light Company  
H. B. Robinson Steam Electric Plant Unit No. 2  
CONTAINMENT DESIGN REPORT FOR AEC USE

In reply to your letter dated October 29, 1969, enclosed are twenty-five (25) copies of the Containment Design Report. Ten (10) additional copies are being sent to you by our Mr. B. J. Escue from Hartsville plant site. It is our understanding, from your telephone conversation on November 18, 1969 with our Mr. T. L. Erion, that you have five (5) copies of the Containment Design Report available at your office. This would bring the total to forty (40) reports available for you to forward to the Atomic Energy Commission.

Very truly yours,

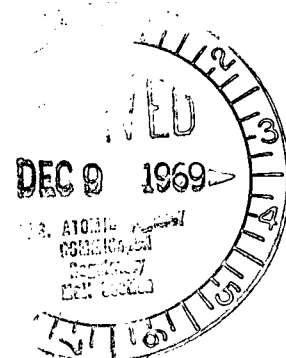

NUCLEAR ENERGY SYSTEMS
