Dear Mr. O'Leary:

H. B. ROBINSON UNIT NO. 2  
LICENSE DPR-23  
REVISION TO TECHNICAL SPECIFICATIONS

It has been noted during a review of the H. B. Robinson Unit No. 2 Technical Specifications that Table 4.2-1, Item 6.5, requires both visual and volumetric inspections of pressure-retaining bolting less than two inches in diameter within the valve pressure boundary (Category G-2). In contrast to this, Section XI of the ASME Boiler and Pressure Vessel Code requires only visual inspections of Category G-2 bolting within the valve pressure boundary. This requirement is spelled out in Table IS-261, Item 6.5 of the ASME Code. In addition, all other components listed in the Technical Specifications and ASME Section XI (i.e., pressurizer, steam generator, piping and pumps) require only visual inspection of Category G-2 bolting.

In order to remove this difference between the Technical Specifications and ASME Section XI, we request that the following revision be made to the Technical Specifications:

Table 4.2-1, Item No. 6.5, in the column labeled "Method," change "Visual and Volumetric" to read "Visual" only.
