Dear Mr. O'Leary:

H. B. ROBINSON UNIT NO. 2
LICENSE DPR-23

REQUEST FOR REVISION OF TECHNICAL SPECIFICATIONS

In reviewing our Technical Specifications for the H. B. Robinson Unit No. 2 Plant, we have found that one of the items concerning the responsibilities of the Company Nuclear Safety Committee (CNSC) should be revised to more accurately depict the duties of the CNSC in reviewing plant modifications of a safety-related nature only. This change would result in a better delineation of duties between the Plant Nuclear Safety Committee and the CNSC, and provide clarification of CNSC activities for reviewing agencies.

We therefore request that the following revision to the Technical Specifications be made:

Change Item 6.1.4.2.e.3 to read: "Review and make recommendations concerning matters including changes and modifications to plant systems or equipment described in the Final Safety Analysis Report which involve reactor protection, engineered safety features or radiation safety, or which may involve an unreviewed safety question as defined in Section 50.59 of 10CFR Part 50, or referred to it by the Plant Safety Committee and/or by the Plant Manager."
