Regulatory Docket File

Carolina Power & Light Company

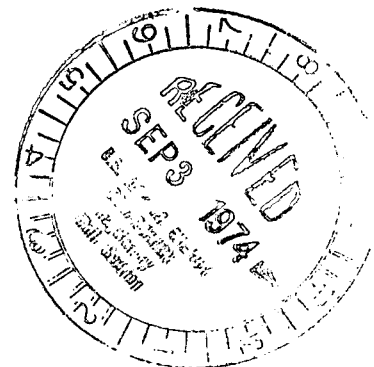

August 30, 1974

File: NG-3514R

Serial: NG-74-1078

Mr. Edson G. Case, Deputy Director
Directorate of Licensing
Office of Regulation
U. S. Atomic Energy Commission
Washington, D. C. 20545

50-261

Dear Mr. Case:

H. B. ROBINSON UNIT NO. 2
LICENSE DPR-23

TECHNICAL SPECIFICATIONS TO MEET REGULATORY GUIDE 1.83

In regard to your letter of July 18, 1974, Carolina Power & Light Company finds that we are unable to meet your suggested schedule for submittal of a proposed technical specification on steam generator tube inspection. As you are aware, we have been following closely the industry progress in connection with PWR steam generators. We have been working with Westinghouse on the H. B. Robinson Unit No. 2 Plant in a continuing program of monitoring the steam generator behavior. Our program was initiated long before issuance of Regulatory Guide 1.83 and is consistent with the intent of the Guide. It has, however, been tailored to obtaining a better understanding of steam generator tubing performance and to the particular history of our units. We are currently reviewing the new Regulatory Guide and working with Westinghouse to develop the requested change in our Technical Specifications. We anticipate that we will submit our proposed amendment by October 1, 1974.

Yours very truly,

E. E. Utley
Vice-President
Bulk Power Supply
