Southern Nuclear Operating Company
Vogtle Electric Generating Plant Units 3 and 4
Schedule of Technical Documentation to Support
Future License Amendment Request for Containment Reanalysis

Ladies and Gentlemen:

In the future, Southern Nuclear Operating Company (SNC) intends to submit a License Amendment Request (LAR) for Containment Reanalysis to the staff for approval in accordance with 10 CFR 50.90. There are several technical documents that will support this submittal, including calculations/analyses for: heat sinks, WGOthic evaluation model, mass and energy releases, steam line break containment integrity, and loss of coolant accident containment integrity. In addition, WCAP-15846, *WGOthic Application to AP600 and AP1000*, Revision 1 (2004), is being revised and will support the future LAR submittal.

SNC has worked with Westinghouse Electric Company, LLC (Westinghouse) to make these technical documents available for Nuclear Regulatory Commission (NRC) review prior to LAR submittal, as discussed during the July 23, 2014 meeting between NRC and AP1000 stakeholders. The accession number for the public meeting notice is ML14192A803. Enclosure 1 contains a schedule detailing when the supporting documentation for the future Containment Reanalysis LAR will be available for NRC audit. The schedule in Enclosure 1 is based on document availability and licensee review of materials. The schedule information is dynamic in nature and may be subject to change.

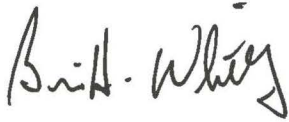

SNC welcomes the opportunity to share documentation with NRC in advance of the formal submittal of the LAR. If NRC elects to audit any of the technical supporting documentation for the future Containment Reanalysis LAR, please contact Kelli Roberts at (205) 992-6831 or kroberts@southernco.com to make arrangements.

This letter does not contain any regulatory commitments.

If you have any questions regarding this letter, please contact Ms. Kelli Roberts at (205) 992-6831.

Respectfully submitted,

SOUTHERN NUCLEAR OPERATING COMPANY
