Small Business Development

Nevada Small Business Development Center

The Business Assistance Network

The following information is being provided to put the DRAFT population projections for 2013 through 2032 in context. The annual projections are attached at the end of this document.

The projections are based on the 2012 estimates and were prepared using the Regional Economic Models, Inc. (REMI) model for Nevada's 17 counties. This discussion presents a comparison of the 2012 and 2013 DRAFT projections for 2031; information on REMI's Out of the Box model; and an overview of the updates that were done to the model in producing the projections.

Two tables and a graph show where Nevada is currently as it continues to recover from the Great Recession. The reader should bear in mind that Nevada was hit by three economic factors in the last decade: the housing bubble; the spike in fuel prices; and the financial crisis.

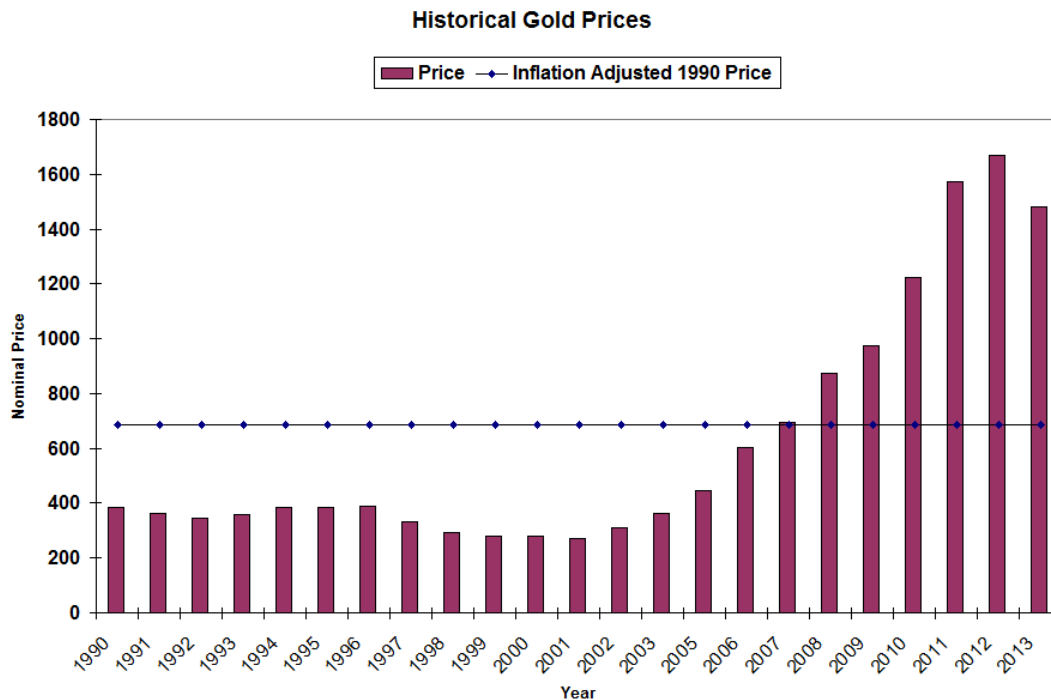

Figure 1. Historic Gold Prices - Source: National Mining Association, KITCO.com accessed 8/7/2013, and Bureau of Labor Statistics CPI Calculator

While gold prices have fallen recently, they are still higher than 1990's inflation adjusted price of \$383.51 an ounce. Any potential discussion of job changes needs to bear this in mind.

Table 1. Comparison of Nevada Job Changes to Surrounding States and United States Total From Peak Employment to June 2013 (thousands of jobs)							
State	Nevada	Arizona	California	Idaho	Oregon	Utah	US Total
Peak Date	May-07	Oct-07	Jun-07	Jun-07	Dec-07	Dec-07	Jan-08
Peak Employment	1297.3	2687.1	15349.2	657.5	1738.1	1265.2	138056
Bottom Employment Date	Sep-10	Sep-10	Feb-10	Jan-10	Feb-10	Feb-10	Feb-10
Bottom Employment	1110.8	2373.2	13845.3	600.9	1591.5	1172.4	129320

Table 1. Comparison of Nevada Job Changes to Surrounding States and United States Total From Peak Employment to June 2013 (thousands of jobs)							
State	Nevada	Arizona	California	Idaho	Oregon	Utah	US Total
Employment as of June 2013 (Preliminary)	1162.8	2508.4	14648.7	639.9	1663.5	1279.3	135876.0
Bottom Less Peak	-186.5	-313.9	-1503.9	-56.6	-146.6	-92.8	-8736
June 2013 less Bottom	52	135.2	803.4	39	72	106.9	6556
Percent Loss	-14.4%	-11.7%	-9.8%	-8.6%	-8.4%	-7.3%	-6.3%
Percent of Lost Jobs Recovered	27.9%	43.1%	53.4%	68.9%	49.1%	115.2%	75.0%
Years from Peak to Bottom	3.3	2.9	2.7	2.6	2.2	2.2	2.1
Source: Bureau of Labor Statistics Seasonally Adjusted Current Employment Data							

As shown in Table 1, Nevada began losing jobs sooner for a longer period of time than its neighboring states and the nation as a whole. More than 52,000 jobs have been recovered since employment bottomed out almost three years ago. Nationally jobs have recovered at a faster rate but there is ongoing concern about the quality of those jobs both for hours worked and wage levels.

Job creation is one way to look at a state's economy, and another is to look at how competitive the state is compared to other areas of the country and what sectors help grow its economy. One tool for looking at that is to calculate a location quotient. A location quotient compares a local region's job distribution to a larger region, in this case, Nevada to the US as a whole. The US percentage distribution of an industrial sector is divided in the local area sector's share. For example, US, manufacturing hypothetically makes up 10% of the workforce while locally it makes up 15% of the workforce. The location quotient for the region's manufacturing sector would be 1.5. A location quotient above one is considered a basic industry which is exporting goods and services. A location quotient of one or less means that the area is supplying those goods and services primarily to itself. A location quotient also shows just how concentrated a local economy is in a specific sector.

Table 2 Nevada Location Quotients for Selected Years for Nevada Using North American Industrial Classification System Categories						
North American Industrial Classification Category	2001-1st Year of NAICS	2006- Housing Peak	2007- Peak Employment	2010 - Bottom Employment	2012- Most Recent Available Data	Difference - 2001 to 2012
11 Agriculture, forestry, fishing and hunting	0.22	0.20	0.20	0.21	0.21	-0.01
21 Mining, quarrying, and oil and gas extraction	2.14	1.87	1.84	2.08	2.17	0.03
22 Utilities	0.72	0.92	0.83	0.87	0.82	0.10
23 Construction	1.60	1.88	1.78	1.20	1.04	-0.56
31-33 Manufacturing	0.32	0.36	0.37	0.37	0.37	0.05

Table 2 Nevada Location Quotients for Selected Years for Nevada Using North American Industrial Classification System Categories						
North American Industrial Classification Category	2001-1st Year of NAICS	2006- Housing Peak	2007- Peak Employment	2010 - Bottom Employment	2012- Most Recent Available Data	Difference - 2001 to 2012

53 Real estate and rental and leasing	1.22	1.24	1.28	1.25	1.25	0.03
71 Arts, entertainment, and recreation	1.80	1.58	1.58	1.47	1.51	-0.29
72 Accommodation and food services	3.25	2.77	2.73	2.83	2.76	-0.49
81 Other services, except public administration	0.66	0.65	0.66	0.69	0.71	0.05
99 Unclassified	0.22	0.30	0.49	0.50	0.45	0.23
Source: Bureau of Labor Statistics Location Quotient Calculator						

Construction employment peaked at a location quotient of 1.88 in 2006 and now is close to only meeting local demand, that is, it is no longer being treated as an export base for the economy. The arts and entertainment sector and the accommodations and food services sector are still the sectors that drive Nevada's economy though it appears they are becoming less dominant compared to the rest of the country. Mining continues to hold its own and the transportation and warehousing sector continues to grow as well. This previous information helps to frame the projections that follow.

Table 3 compares the 2012 Final and the 2013 DRAFT projections for the year 2031 since the 2012 projections only go out that far. Overall for the state as a whole we are projecting a growing population but one that is lower than last year's projection by 120,972.

Table 3 Comparison of 2012 Issued Projections and 2013 Projections For 2031			
	2012	2013	Difference 2013 Projection Less 2012 Projection
Carson City	60,106	63,506	3,400
Churchill	33,100	31,526	-1,574
Clark	2,436,276	2,343,821	-92,455
Douglas	48,821	50,390	1,569
Elko	74,183	55,487	-18,696
Esmeralda	870	863	-7
Eureka	3,797	2,383	-1,414
Humboldt	26,477	16,808	-9,669
Lander	8,540	5,137	-3,403
Lincoln	7,575	5,805	-1,770
Lyon	68,655	60,318	-8,337
Mineral	6,694	4,318	-2,376
Nye	64,903	48,326	-16,577
Pershing	7,562	6,484	-1,078
Storey	6,725	4,797	-1,928
Washoe	501,302	541,541	40,239
White Pine	14,895	9,153	-5,742
State Total	3,370,481	3,250,664	-119,817

The REMI model which underlies these projections comes with an “out of the box” (OOB) projection for both the nation as a whole and the 17 counties in Nevada. The user can adjust the national as well as the local projection.

The first step is to update the national projection and compare that against other sources. There are a number of factors that can potentially impact the national economy, the greatest continued drag seems to be the impact of sequestration on Federal spending. Additionally, there continues to be a lack of agreement on the Federal debt ceiling and there are stories of a potential government shut down. Moody's has an employment scenario that factors in these factors continuing to be a drag on the economy. REMI's out of the box projection was projecting annual growth of 1.2% and the Moody's projection for 2013 to 2033 was 0.9%. The Moody's projection was used from 2013 to 2018 and then REMI's projection beyond that point. Figure 2 shows how the three projections compare. The national forecast that was used in these projections had an average growth rate of 1.1%.

Updating the national projection in REMI also impacts the Nevada economy. This is illustrated in Figure 2 which also adds in county level information. The OOB line shows Nevada's employment from the out of the box model, the next line in the graph shows employment with only the national employment updated as previously discussed, and the Nevada Employment Update line shows what happens with only updating Nevada's local employment numbers. The model is built off of a last historic year of 2011. Data was available so the actual employment could be updated with more recently reported data for 2013 for Clark and Washoe Counties. The other counties were updated to reflect 2012 data. With updating for local changes Nevada's projected employment drops from where the model predicts it to be with only the national employment changes. For reasons beyond the scope of this report, Nevada continues to lag in its recovery compared to the nation as a whole.

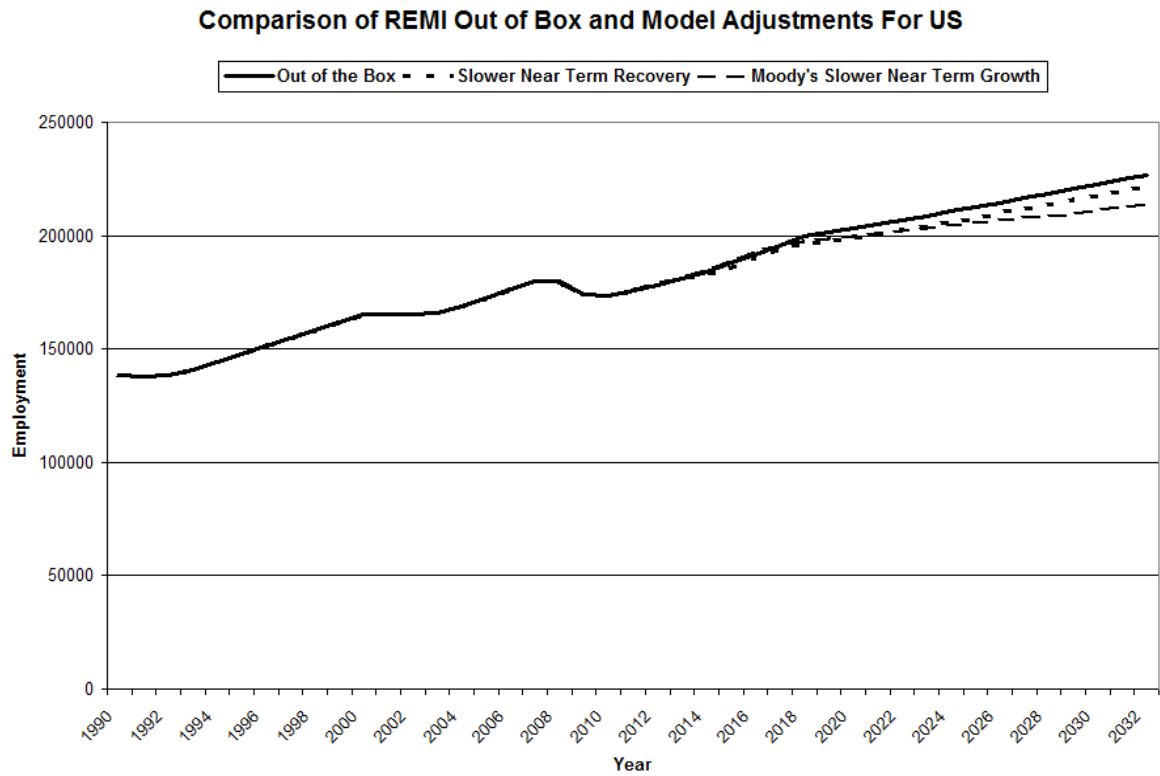

Figure 2 Comparison of REMI National Out of the Box and Adjusted Projections

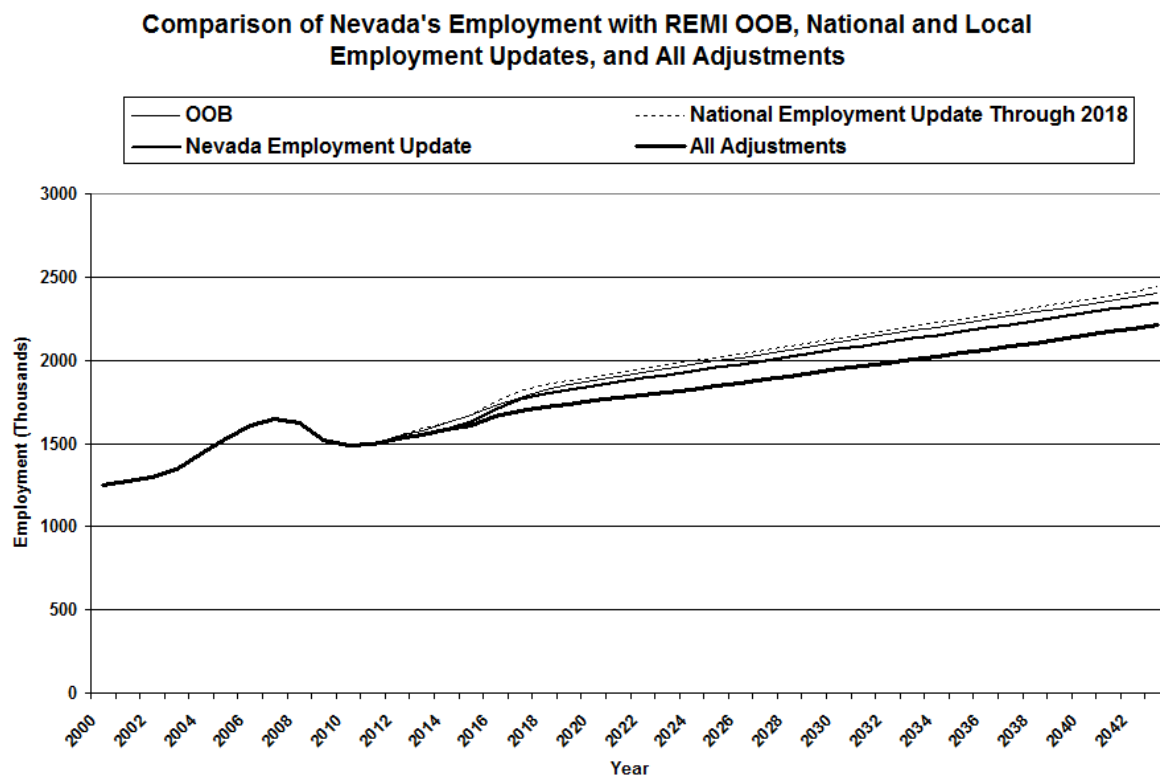

Figure 3 Comparison of Nevada Employment Scenarios

With the

REMI model, the user can make changes to the Out of the Box (OOB) projection through using policy variables in the model. Changes in these variables impacted the statewide employment shown in Figure 3 as the All Adjustments line. One of the main adjustments was to increase mining employment. The OOB model had a loss in employment while showing gains in worker productivity. Employment was adjusted upward and productivity was adjusted downward. It was assumed for the purposes of these projections that overall mining employment will be relatively flat for the next three years and then fall to historic average levels for the period between 1990 and 2012. While gold mining may lose employment other mineral mining or petroleum drilling areas may be developed so that the aggregate total of mining jobs follows these two assumptions. The counties that this adjustment was made to were: Elko, Esmeralda, Eureka, Humboldt, Lander, Pershing, Storey and White Pine. The aggregate total across all these counties is shown below in Figure 4.

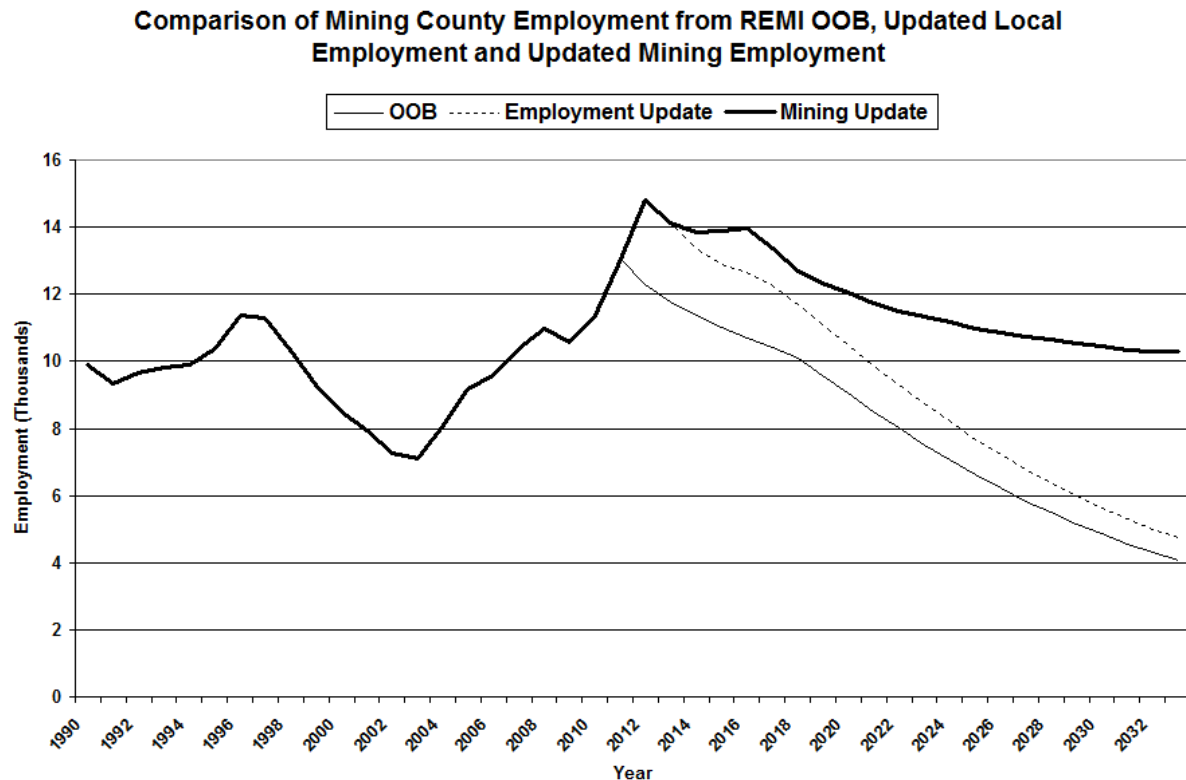

Figure 4 Comparison of Mining Employment Scenarios

The other categories and region where there was a substantial adjustment made was to Clark County's Arts, Entertainment, and Recreation sector and the Accommodation and Food Services sector. The Out of the Box projection in employment in these sectors equated to a gain of 57,913 hotel rooms over the time period for these projections and the current occupied units implied for 2012 exceeded occupied units reported by the Las Vegas Convention and Visitors Authority (134,481 implied in the model compared to 127,005 or 84% occupied which is the 2012 rate). From 1990 through 2012 the average number of employees in the Accommodations and Food Service sector has been 1.74 employees per room. The high was in 2008 at 1.95 and low was 1.54 per room in 1993. For occupied rooms, the average has been 2.02 employees per room. The high was 2.17 in 2007 and the low was 1.76 in 1993.

Occupancy has ranged from 68% in 1970 to a high of 90.4% in 1996. The average from 1970 to 2012 has been 82.8% and the average since 1996 has been 86%. This is much higher than the national rate of 60% in 2012.

Given that there is only one large project announced at this time, the Genting Groups 3,500 room project on the old Stardust site, the model's employment was adjusted to show fewer new rooms being built over the next 20 years. Table 4 shows the result of these adjustment a calculation of rooms using the historic ratio of employees to total rooms and occupied rooms.

Table 4 Comparison of Room Projections Between REMI's Out of the Box Model and Employment Revisions for Accommodations and Food Services and Arts, Entertainment and Recreation

	Out of the Box			Updated and Adjusted Employment	
	Total Rooms	Occupied Rooms		Total Rooms	Occupied Rooms
2012 Actual	150,481	127,006		150,481	127,006
2012	151,468	130,472		143,931	123,979
2013	157,202	135,411		146,194	125,928
2014	163,360	140,715		150,300	129,466
2015	169,695	146,172		152,605	131,451
2016	175,577	151,239		156,610	134,901
2017	180,945	155,862		157,401	135,582
2018	185,909	160,138		158,123	136,204
2019	188,420	162,301		158,825	136,808
2020	190,472	164,069		159,518	137,405
2021	192,209	165,565		160,171	137,968
2022	193,995	167,103		160,789	138,501
2023	195,630	168,512		161,350	138,984
2024	197,275	169,929		163,143	140,528
2025	198,809	171,250		164,859	142,007
2026	200,361	172,587		166,512	143,430
2027	201,930	173,939		168,106	144,803
2028	203,385	175,191		169,642	146,126
2029	204,962	176,550		171,154	147,428
2030	206,670	178,022		172,651	148,718
2031	208,124	179,274		174,113	149,978
2032	209,381	180,357		175,547	151,213
Change in Rooms	58,900			25,066	

Finally, in preparing the projections information from rural Nevada news clippings were reviewed to see what significant projects have been announced that might impact a local economy as an export activity and help bring in new dollars. The population projections are attached in the following table as is detailed employment by industry for each county.

Population Projections for Nevada's Counties 2013 to 2032
