Re: License Number 24-18628-01, Control 584332; Amendment request of July 14, 2014, Addendum of July 25, 2014 and Addendum of August 8, 2014.

Dear Ms. Simmons:

This letter is a **third** addendum to our amendment request dated July 15, 2014 which was assigned control number 584332. The first and second addendums were dated July 25, 2014 and August 8, 2014.

We had requested the removal of all Authorized Users listed for 35.400 materials but did not state that that it is our intention to dispose of all sources in this category in the not too distant future. The only sources in possession in this category are Cs-137. When this happens, proper documentation including a room diagram, enhanced survey/wipe tests and shipping and receiving papers will be sent to the NRC so the storage room may be decommissioned.

Sincerely,

A handwritten signature in dark ink, appearing to read "Martin S. Richman".

Dear Ms. Simmons,

To solve the problem that occurred when we requested that all our AUs for 35.600 be removed I can now provide a materials license listing a 35.600 AU who now practices at our institution. I will submit another addendum requesting the addition of this AU. It will also include the board certification of Dr Shaffer showing the last digit of the date which was missing on the previous submission. Should I submit an email direct to you with attachments or is it more appropriate to fax the addendum to the branch chief.

Thanks,
Marty Richman, RSO
