Hi Joe,

These two are not reports, per se, just some more 'templates' that we've been creating for utility / owner use with the various A/LAIs. I thought I had previously passed these along to you and Jeff P., but may have forgotten.

You are welcome to include these in ADAMs; they're all non-Prop., and have been sent out to the EPRI MRP member representatives, who are utility owners as well.

Best Regards,
Kyle J. Amberge, Senior Technical Leader

Kyle,

MRP 2014-017 and 2014-019 were mentioned at a Code meeting yesterday, and they seem to be pertinent to some of the action items. MRP 2014-017 relates to AI #1 &2 and 2014-019 relates to AI#7.

Staff was wondering what the EPRI plans were for these reports. Will they be submitted to NRC? I do not find them in ADAMs so they have not yet been submitted. Staff was wondering what was being recommended to plants in the reports.

Thanks,

Joe
