Subject: FW: Prairie Island ISFSI LRA Question Responses

Jean,

We have reviewed the question responses and confirm that they contain no proprietary information and are suitable for release to the public.

We also would like to point out that further information about the RSG project is available in ADAMS, ML12277A176. This is a presentation we made to NRC Region 3 personnel. It is mostly technical information about the design, manufacture, installation, and testing of the RSGs, and it supports our response to Question 5. Please note that this is not intended to change the responses to your questions that we provided last week, but it is a good reference to information already in ADAMS that might be useful to you and your reviewers.

Best regards,

Sam Chesnutt

Jean,

I will have to confirm with our folks early next week and get back to you. I really don't think anything is proprietary but I need to get confirmation.

Thanks,

Sam Chesnutt

Thank you Sam,
I appreciate your efforts to provide us with the details of this site activity. We will incorporate the information into our developing environmental document.

It is my intention to make this document available in ADAMS, please verify for me that all of the information contained in it is appropriate for public release. If any portions are not we can redact those prior to release. Thank you again for your response.

Have a great day!
Jean

Subject: Prairie Island ISFSI LRA Question Responses

Jean,

Attached are our responses to questions you provided to Gene Eckholt regarding the recent Steam Generator Replacement (SGR) project at Prairie Island Nuclear Generating Plant, Unit 2. This information is provided to support the NRC's Environmental Assessment of the License Renewal Application (LRA) for the Prairie Island Independent Spent Fuel Storage Installation (ISFSI).

These responses are provided on a Prairie Island QF-0739 form - this is typically used to respond to inspection questions and can also be used to document responses to questions such as the ones you provided.

If you have any further questions, please contact either me or Gene.

Thanks,

Sam Chesnutt
