**RE: License SUA-1473, Docket No. 40-8905
Change in Site Management**

Dear Mr. McLaughlin,

We would like to inform you of recent changes in Rio Algom Mining LLC (RAML) management. After four years as RAML site manager, I am now focusing on managing closure execution projects for Reclamation & Closed Mines Group at BHP Billiton. In this role, I continue to be responsible for management of the reclamation project currently under way at the Ambrosia Lake Facility.

Anthony ("Tony") Baus has been assigned as manager of RAML with responsibilities over operations, maintenance, and monitoring at both the Ambrosia Lake and Lisbon Valley sites. Mr. Baus has 43 years of experience in mining operations and 35 years in management. During the last 15 years, he has focused on mine closure projects in Arizona, California, and Australia. In addition to Mr. Baus, Theresa Ballaine has been appointed as superintendent focused on regulatory compliance. Ms. Ballaine has a degree in Chemistry with 18 years of experience in mine closure.

We believe that we have put in place a strong team that will enable us to continue meeting the conditions of License SUA-1473. Please feel free to contact me, Mr. Baus, or Ms. Ballaine with any questions that you may have, our contact information is detailed below

Sincerely,

Billy Ray
