SUBJECT: R.E. GINNA NUCLEAR POWER PLANT, LLC – U.S. NUCLEAR REGULATORY
COMMISSION MATERIAL CONTROL AND ACCOUNTING PROGRAM
INSPECTION REPORT NO. 05000244/2014405

Dear Mr. Pacher:

On September 3, the U.S. Nuclear Regulatory Commission (NRC) completed a security inspection at your R.E. Ginna Nuclear Power Plant, LLC (Ginna). The NRC inspectors discussed the results of the inspection with you and other members of your staff. Inspectors documented the results of this inspection in the enclosed inspection report.

NRC inspectors documented one finding of very low security significance (Green) in this report. This finding involved a violation of NRC requirements. Further, inspectors documented a licensee-identified violation which was determined to be of very low security significance in this report. The NRC is treating these violations as non-cited violations (NCVs) consistent with Section 2.3.2.a of the Enforcement Policy. If you contest the violations or the significance of the NCVs in this report, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the United States Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington DC 20555-0001; with copies to the Regional Administrator, Region I; the Director, Office of Enforcement, United States Nuclear Regulatory Commission, Washington, DC 20555-0001; and the NRC Resident Inspectors at Ginna.

A cross-cutting aspect was assigned to the finding in the area of Human Performance, specifically, Teamwork (H.4), because the licensee did not ensure that individuals and work groups communicated and coordinated their activities within and across organizational boundaries to ensure nuclear safety is maintained. If you disagree with the cross-cutting aspect assignment, you should provide a response within 30 days of the date of this inspection report, with the basis for your disagreement, to the Regional Administrator, Region I, and the NRC Resident Inspectors at Ginna.

Enclosure contains Sensitive Unclassified Non-Safeguards Information. When separated from enclosure, the transmittal document is decontrolled.
