Philips Lighting Company

January 13, 2011

Material License: **29-20609-02E**  
Docket: 030-22295

Mr. Charles L. Miller - Director  
Office of Federal and State Materials  
and Environmental Management Programs  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Mr. Miller,

I am submitting the annual byproduct material transfer report for the above Materials License. This license authorizes Philips Lighting Company to distribute electron tubes, glow switches, and inner arc tubes containing byproduct material to persons exempt from licensing pursuant to Section 30.15, 10 CFR Part 30.

The last material transfer report for this license was filed in January 2010 and covered annual material transfers for calendar year 2009. The attached report reflects material transfers for calendar year 2010. Therefore, we are consistent in submitting this information without gaps in our reporting coverage.

As has been the past practice, and agreed to by the NRC in prior correspondence, the report summarizes the material transfers by licensed isotope. If the NRC requires a description or identification of each product and model number transferred, this information can be provided. However, such information would be provided only as proprietary business information that must remain confidential. Public disclosure would expose confidential sales information to our market competitors.

If there are any questions regarding this report, or its submission, please contact me directly by phone (908-705-4743) or by e-mail ([dean.weeks@philips.com](mailto:dean.weeks@philips.com)).

Best regards,

Dean Weeks  
Director – Projects Engineering & Environmental

CALENDAR YEAR		Kr-85	H-3	PM-147	Total
	Material Form:	(gas)	(gas)	(wire)	
2010	Units transferred	1,859,797	199,815	0	2,059,612
	nanoCuries	27,725,034	2,941,950	0	30,666,984
	milliCuries	27.73	0.00	0.00	27.73
	Curies				0.03

The products containing Tritium were re-introduced in 2010.

The phase-out of products containing Pm-147 was initiated 4 years ago and the inventory was depleted in 2008.
