

UNITED STATES
NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

September 17, 2014

Mr. Michael J. Pacilio
Senior VP, Exelon Generation Co., LLC
President and CNO, Exelon Nuclear
4300 Winfield Road
Warrenville, IL 60555

SUBJECT: LASALLE COUNTY STATION, UNITS 1 AND 2;
REQUALIFICATION PROGRAM INSPECTION

Dear Mr. Pacilio:

In a telephone conversation on September 16, 2014, Mr. T. Dean, Operations Training Manager, and Mr. D. McNeil, Senior Operations Engineer, made arrangements for the U.S. Nuclear Regulatory Commission (NRC) to inspect a portion of your Requalification Program at your LaSalle County Station, Units 1 and 2. Mr. McNeil will review the scenarios to be administered the week of the inspection and observe the Training Department's administration of those requalification tests in accordance with Inspection Procedure 71111.11B. Mr. McNeil will also be reviewing the station's operating history and performing a portion of the Problem Identification and Resolution inspection associated with Inspection Procedure 71111.11B. The inspection is planned for September 24 – 25, 2014, which coincides with your regularly scheduled requalification examination cycle. The staff at your facility should prepare and conduct the requalification examinations in accordance with your NRC-approved Requalification Program.

In accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) 55.59(c), the NRC may request facility licensees to submit their biennial comprehensive requalification written examinations or annual operating tests as necessary to support the NRC's inspection program needs. The NRC will review the operating test scheduled for the week of September 22, 2014, at the site. Therefore, it will not be necessary to provide any material in advance of this inspection.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records System (PARS) component of NRC's Agencywide Document Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Thank you for your cooperation in this matter. If you have any questions regarding this inspection, please contact Mr. D. McNeil at 630-829-9737, or I can be reached at 630-829-9707.

Sincerely,

/RA Richard K. Walton Acting for/

Hironori Peterson, Chief
Operations Branch
Division of Reactor Safety
