

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

May 3, 2016

Brian Langkan, RSO  
System Sensor, Division of Honeywell  
3825 Ohio Avenue  
St. Charles, IL 60174

SUBJECT: INACTIVATION OF REGISTRATION CERTIFICATE NO. NR-0547-D-101-E

Dear Mr. Langkan:

In a letter dated, March 30, 2012, you requested the cancelation of sealed source registry, Attachment 13, as part of your application for an exempt distribution license pursuant to 10 CFR 32.14. On July 3, 2012, the U.S. Nuclear Regulatory Commission issued an inactivated registration certificate with number NR-0547-D-801-E. Due to an administrative oversight the new inactive registration was not mailed to you. In order, to correct this oversight we are including in the enclosure of this letter a copy of your inactive registration certificate NR-0547-D-801-E dated, July 3, 2012.

Furthermore, on October 8, 2014, we were notified by the State of Illinois that the only active System Sensor registration will be inactivated. As part of the administrative process we have issued a new inactive registration certificate dated October 9, 2014, to reflect the new inactive vendor code. A copy of the registration certificate NR-8294-D-801-E is enclosed. Please note that after this action was completed the staff reached to your company to verify the address and was forwarded to a consultant named Eli Port. Mr. Eli Port indicated that he would get back to us with the information. Since, we did not receive further information we are proceeding with the issuance of the registration certificate. Please read over the registration certificate in its entirety and notify us immediately of any errors or omissions.

If you have any questions, please contact me at [Lymari.Sepulveda@nrc.gov](mailto:Lymari.Sepulveda@nrc.gov) or (301) 415-5619.

Sincerely,

/RA/

Lymari Sepulveda, General Engineer  
Materials Safety Licensing Branch  
Division of Materials Safety, States, Tribal,  
and Rulemaking  
Office of Nuclear Material Safety and Safeguards

Enclosure: As stated
