

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

Mr. Motti M. Slodowitz
President, CampCo
4625 W. Jefferson Blvd.
Los Angeles, CA 90016

Dear Mr. Slodowitz:

I am responding to your letters dated December 2, 2011, and September 18, 2012 (Agencywide Documents Access and Management System (ADAMS) Accession No(s). ML12132A332 and ML13112B010), by which you submitted to the U.S. Nuclear Regulatory Commission (NRC) a petition for rulemaking (PRM). Specifically, you requested that the Commission amend its regulations concerning exemptions from licensing requirements to include illumination markers containing tritium. The petition was docketed as PRM-32-8, and the NRC published a notice of receipt and request for public comments in the *Federal Register* on July 11, 2013 (78 FR 41720), and posted on www.regulations.gov under Docket ID NRC-2013 0078. The comment period closed on September 24, 2013. The NRC received one comment submission in response to the request for comments (ADAMS Accession No. ML15008A372).

The NRC has considered the petition, and the arguments raised therein, as well as the comment received in response to the petition. For the reasons stated in the enclosed *Federal Register* notice, your petition for rulemaking is being denied.

The NRC has concluded that your petition fails to demonstrate that a specific exemption is warranted and that the existing regulatory framework for self-luminous products is inappropriate.

This petition is considered closed.

Any questions you may have regarding this matter should be directed to Vanessa Cox by calling (301) 415-8342 or by e-mail to Vanessa.Cox@nrc.gov.

Sincerely,

Annette Vietti-Cook,
Secretary of the Commission.
