July 19, 1979

Mr. Thomas A. Ippolito, Chief  
Operating Reactors Branch #3  
Division of Operating Reactors  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

SUBJECT: XN-NF-79-6(P), "Exxon Nuclear Analysis of Power Distribution  
Measurement Uncertainty for Westinghouse PWRs," dated March 1979 (1 page)

References: 1) Letter, T. A. Ippolito to W. S. Nechodom, dated  
June 29, 1979  
2) Letter, L. O. Mayer to Director of Nuclear Reactor  
Regulation, dated March 30, 1979

Dear Mr. Ippolito:

In Reference 1 you suggested that the subject report be submitted for generic review. Previously, it had been submitted by Northern States Power (Reference 2) in support of licensing action for the Prairie Island units. In response to your suggestion we are requesting that you review and approve the subject report for generic application to W PWRs for which ENC provides engineering services. Presently, this report is applicable to H. B. Robinson Unit 2, D. C. Cook Unit 1, R. E. Ginna, Prairie Island Unit 1, and Kewaunee. It will also be applicable to Prairie Island Unit 2 when that reactor is operated with Exxon Nuclear supplied fuel in late 1979 or early 1980.

Each of the forty (40) copies of the subject report, which were transmitted to you, inadvertently had a page deleted following page numbered 26. Enclosed with this letter are forty copies of the deleted page, designated Page 26a, which should be inserted between the existing Pages 26 and 27 of the report.

Exxon Nuclear Company considers the information contained in the report XN-NF-79-6(P) to be proprietary. In accordance with the Commission's regulation 10CFR2.790(b), the Affidavit executed by our Dr. Roy Nilson and transmitted by Northern States Power in Reference 2 provides the necessary information to support the withholding of the subject document from public disclosure.
