7a. Parties listed above are freight forwarding or transportation companies that will be responsible for arranging all transportation from the conversion facility to the ultimate foreign consignee.

9 and 9a (additional clarification)

The final end-use of the nuclear material sent to China will be nuclear fuel. Uranium hexafluoride will be enriched at CNNC (China National Nuclear Corporation) Lanzhou enrichment corporation (Lanzhou, Gansu province, China) and processed for consumption in commercial nuclear power stations owned or operated by ConverDyn's utility customers in China, North America or Europe.

11. Foreign Obligations (best estimate at time of application submittal)

If a ConverDyn Customer requests shipment of foreign-obligated natural uranium during the term of this export license, the license will be amended to include it. However, at this time we are not aware of any foreign-obligations for natural uranium hexafluoride to be shipped to China. We currently expect all material shipped under this license will be U.S. obligated, only.
