NUCLEAR REGULATORY COMMISSION**
WASHINGTON, D.C. 20555-0001

March 19, 2015

MEMORANDUM TO: Mark A. Satorius
Executive Director for Operations

FROM: K. Steven West, Chairman **/RA/**
Committee to Review Generic Requirements

SUBJECT: COMMITTEE TO REVIEW GENERIC REQUIREMENTS:
MINUTES OF MEETING NUMBER 436

By memorandum of February 20, 2015, the Office of Nuclear Material Safety and Safeguards (NMSS) requested that the Committee to Review Generic Requirements (CRGR, the Committee) review and endorse Generic Letter (GL), 20XX-XX, "Treatment of Natural Phenomena Hazards in Fuel Cycle Facilities" (Agencywide Documents Access and Management System (ADAMS) Accession No. ML14349A366). On February 26, 2015, CRGR held Meeting Number 436 with the staff to discuss the GL (ADAMS Accession No. ML14328A029). The list of meeting attendees is enclosed.

Jonathan Marcano and Margie Kotzalas with the support of Marissa Bailey—all from NMSS—briefed the CRGR and addressed the CRGR's questions. The staff's presentation materials are located in ADAMS Accession No. ML15056A155.

The staff informed the CRGR that the purpose of issuing this GL is to request all the addressees licensed under Title 10 of the *Code of Federal Regulations* (10 CFR) Parts 40 and 70 to submit a written request to the U.S. Nuclear Regulation Commission (NRC) in accordance with the provisions of 10 CFR 40.31(b) and 10 CFR 70.22(d). The requested response will provide information to demonstrate if compliance is being maintained with the regulatory requirements and applicable license conditions regarding the treatment of natural phenomena hazard events in the facilities' safety assessments. Addressees are required to provide a written response containing the requested information within three months of issuance of the GL.

The CRGR engaged in discussion with the staff and requested that the staff include stronger language to connect the information request to the appropriate regulatory requirements. Also, the CRGR suggested several editorial changes and provided some text that would remove ambiguity regarding the requested information. The staff agreed that the CRGR comments would strengthen the GL and that the requested edits would enhance the document.

On March 4, 2015, the staff provided its revised version of the GL (ML14328A029) to the CRGR. The CRGR reviewed the revision and concluded that it addressed the CRGR comments noted above. Subsequently, the CRGR endorsed the revised GL for issuance. This memorandum documents the CRGR's review and endorsement of the proposed GL 20XX-XX, "Treatment of Natural Phenomena Hazards in Fuel Cycle Facilities," and completes CRGR action on the staff's request of February 20, 2015.
