Subject: Improper use of PRA.

Dear Chairman and Commissioners,

Today, I availed myself of the privilege granted by Law to listen in to a public meeting on SDP of inspection findings that cause an initiating event. I heard the PRA used improperly. When I pointed out the improper use, I was told that the PRA doesn't apply to operating data. I pointed out that 'inspection findings' were operating data. The facilitator backed down from his previous statement.

This can all be verified from the transcript.

I respectfully request that all staffers be told that regulatory guide 1.2 requires that PRA compliments the deterministic approach, and that the cart goes before the horse, not v.v.

Respectfully submitted,

Marvin Lewis
