Desc: A letter was sent to Sandra Galef from Michele Evans of the NRC dated March 13, 2015. In this letter the NRC indicated it used the EPA ALOHA computer methodology to recalculate the blast radius. Please provide this ALOHA calculation, the reason for the use of ALOHA vs RG 1.91, input assumptions, along with any draft assumptions and the results. Also provide any other calculations such as those required by NRC Regulatory Guide 1.91 to calculate the blast radius from the potential rupture of the 42 inch gas transmission line.

All signatures, approvals and dates are also requested.
