General Comment

To the Members of the NRC

Dear Sirs,

as a citizen living close enough to the VY Nuclear Power Plant to be effected in case of an accident on the site I urge you to request that Entergy maintain the Emergency Planning Zone until all spent fuel is moved to the dry cask storage and eventually from site. I am particularly concerned about a possible loss of spent fuel pool water and the risk of a Zirconium fire. In order to reduce that risk, Entergy has to be required to remove all the spent fuel that has cooled long enough from the pool right away.

Concerning the dry cask storage, I cannot comprehend why the higher quality dry casks that are being used in Europe and Japan are not required here. I hope that in matters of this seriousness you will not let your decisions be guided by cost but by security only. Our, the people's, lives - including your own - could depend on it. I am asking you further that you not allow Entergy to cut corners and use Decommissioning Trust Fund money for moving spent fuel into the dry cask system but have it come from Entergy's profits as has been established.

Thank you for considering my concerns.

sincerely

Ulrike von Moltke, Sharon VT
