Dear Mr. Chambers:

Enclosed is Amendment No. 07 to your NRC Material License No. 24-32591-01. Please note that the changes made to your license are printed in **bold font**.

In accordance with our telephone conversation on April 9, 2015, please note that we have amended your license to add the requested authorize user. Your request to expand your Service license to include other services, including remediation of NRC license materials is under a technical review by our Decommissioning Branch. We will continue to keep you informed of our review.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 Code of Federal Regulations 2.390, this letter is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The enclosure document contains sensitive-related information.  
When separated from this cover letter this is uncontrolled.
