Subject: Request for revision to report of annual exempt distribution dated January 9, 2015

Dear Mr. Barry,

I've reviewed your exempt distribution report dated January 9, 2015.

Your report indicates the maximum quantity (rather than the actual quantity) of radionuclide distributed, but not the total quantity of each radionuclide contained in each type of product and each model number. Also, your report does not provide information for the specific model numbers that you distribute.

Please revise and resubmit your report to indicate the total quantity of each radionuclide contained in each type of product and each model number. Please also include the number of units of each type of product transferred, by model number, if applicable. Further information about the requirements that apply to annual reports of exempt distribution can be found in the attached Regulatory Issue Summary.

A hard copy of your revised report should be addressed and sent to:

ATTN: Document Control Desk/Exempt Distribution
Director, Office of Nuclear Material Safety and Safeguards
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

If you have any questions, please feel free to contact me.

Regards,
Eric
