Selected Licensee Commitments Manual (SLC)

Gentlemen:

Pursuant to 10CFR 50.4 and 50.71, please find attached 7 copies of the latest revisions to the Oconee Selected Licensee Commitments Manual (SLC). The SLC Manual is Chapter 16.0 of the Oconee Updated Final Safety Analysis Report (UFSAR). This manual is intended to contain commitments and other station issues that warrant higher control, but are not appropriate for inclusion into the Technical Specifications (TS). Instead of being updated with the annual UFSAR Update, the SLC Manual will be updated as necessary throughout the year.

Very truly yours,

W. R. McCollum, Jr.
Vice President
Oconee Nuclear Station

Subject: Oconee Selected Licensee Commitments Manual (SLC)
Revision

On June 23, 1999, Station Management approved revisions to SLC 16.9.1, 16.9.7, and 16.9.8 to be implemented on June 24, 1999. This revision eliminates SLC 16.9.8 "HPSW Pump Requirements to Support LPSW," Commitments b and c to SLC 16.9.7 "Keowee Lake Level," and the Note to SLC 16.9.1 "Fire Suppression Water Supply Systems". The purpose of SLC 16.9.8 and SLC 16.9.7.b was to provide greater assurance that the HPSW would be available to support CCW during and following a LOOP. SLC 16.9.7.c pertained to maintaining a minimum number of CCW pumps operating to provide greater assurance that the system was relatively air-free so that a siphon would be established during a LOOP. The informational Note to SLC 16.9.1 was deleted since it refers to the requirements of SLC 16.9.8 that are being eliminated. The functions served by these licensee commitments are no longer necessary and have been replaced by the ECCW upgrades and associated TS.

Please revise your SLC manual according to the instructions below.
