Subject: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287  
Request for Technical Specification Amendment  
Steam Generator Tubing Surveillance

In a letter dated October 20, 1997, Duke Energy Corporation (Duke) requested an amendment to the Technical Specifications for Oconee Nuclear Station Units 1, 2, and 3. The amendment consisted of proposed changes to the Steam Generator Tubing Surveillance requirements. In a letter dated November 3, 1997, Duke submitted a supplement to the initial amendment request.

The Technical Specification amendment request contained a topical report which was proprietary to Framatome Technologies, Inc. The information which was proprietary was clearly marked as proprietary. An affidavit from Framatome Technologies was included with the Technical Specification amendment request for the proprietary information. As part of the amendment request, Duke committed to submit a non-proprietary version of the topical report at a later date. In accordance with the commitment in the Technical Specification amendment request, a non-proprietary version of the topical report is attached to this letter.

If there are any questions regarding this submittal, please contact Michael Bailey at (864) 885-4390.

Very truly yours,

W. R. McCollum, Jr.  
Site Vice President
