Re: Florida Power & Light Company
Proposed Turkey Point Units 6 and 7
Docket Nos. 52-040 and 52-041
Correction of Evacuation Time Estimate - Revision 4 Figure H-23 Error

Reference:

1. FPL Letter L-2014-316 to NRC dated October 29, 2014, Combined License Application Submittal 13, Submittal of the Annual Update of the COL Application - Revision 6 and the Semi-Annual Update of the Departures Report

Florida Power & Light Company (FPL) submitted the Combined Operating License Application Revision 6 to the Nuclear Regulatory Commission (NRC) on October 29, 2014 (Reference 1). On March 10, 2015 the NRC notified FPL of a potential incorrect figure in COL Application Part 5, Supplement 1, Turkey Point Nuclear Power Plant Evacuation Time Estimate (ETE), Revision 4, submitted as part of Reference 1.

In Revision 4 of the ETE, FPL added 3 new regions. The description of these three regions was provided in ETE Table 6-1, Description of Evacuation Regions. Region 23 is identified as consisting of areas 1, 2, 3, 4, 7, and 8. However, ETE Figure H-23, Region R23, which represents Region 23, shows areas 1, 2, 3, 4, 8, and 9 as evacuating with this region.

FPL and its ETE contractor investigated and confirmed that the error was solely in the documentation, as presented in Figure H-23. FPL's contractor initiated a corrective action report, checked the simulation model input streams, and confirmed that the simulation model input streams were correct for Region R23. As such, the evacuation time estimates for Region R23 are accurate. An incorrect combination of areas in the GIS map was used to generate Figure H-23 for ETE Revision 4.

The Attachment of this letter provides a copy of the replacement Figure H-23. The corrected figure will be incorporated into the Turkey Point Units 6 & 7 COL Application Revision 7.
