DIVISION 125

Materials Safety and Security

OAR 333-118-0040 for Part 30.13

Exemptions

(1) Common and contract carriers, freight forwarders, ~~and~~ warehouse workers ~~and the U.S. Postal Service that are exempt from the regulations in this division and divisions 102, 105, 113, 116, 121, and 125 subject to the requirements of the U.S. Department of Transportation in 49 CFR 170 through 189 or the U.S. Postal Service in the U.S. Postal Service Manual Domestic Mail Manual, (DMM), section C-023.9.0 are exempt from the rules in chapter 333, divisions 102, 105, 113, 116, 117, and 121~~ and the requirements for a license to the extent that they transport or store radioactive material in the regular course of their carriage for others or storage incident thereto. Common and contract carriers who are not subject to the requirements of the U.S. Department of Transportation or U.S. Postal Service are subject to OAR 333-118-0030 and other applicable requirements of these rules.

(2) Any licensee is exempt from the requirements of this division to the extent that the licensee delivers to a carrier for transport a package containing radioactive material having a specific activity not greater than (0.002 microcurie per gram 70 Becquerels per gram (Bq/g).

(3) Any physician licensed under division 116 or by an Agreement State or the Nuclear Regulatory Commission to dispense radiopharmaceuticals in the practice of medicine, is exempt from OAR 333-118-0050 with respect to transporting licensed material for use in the practice of medicine.

(1) Oregon Administrative Rule 333-125-0005 through 333-125-0200 contains the physical protection program requirements for any licensees that possess an aggregated category 1 or category 2 quantity of radioactive material listed in Appendix A to 10 CFR Part 37. These requirements provide reasonable assurance of the security of category one or two quantities of radioactive material by protecting these materials from theft or

diversion. Specific requirements for access to material, use of material, transfer of material, and transport of material are included. No provision of this part authorizes the possession of licensed material.

(24) Background Investigations, Access Control Program and Physical Protection During Use Requirements apply to any persons who possesses or uses at any site, an aggregated category 1 or category 2 quantity of radioactive material.

(3) Physical Protection in Transit applies to any person who under the rules in this division;

(a) Transports or delivers to a carrier for transports in a single shipment, a category one or category two quantity of radioactive material; or

(b) Imports or exports a category 1 or category 2 quantity of radioactive materials. The rules that establish the physical protection program apply to the domestic portion of the transport.

333-125-0010 Part 37.5

Definitions

(1) "Access control" means a system for allowing only approved individuals to have unescorted access to the security zone and for ensuring that all other individuals are subject to escorted access.

(2) "Aggregated" means accessible by the breach of a single physical barrier that would allow access to radioactive material in any form, including any devices that contain the radioactive material, when the total activity equals or exceeds a category 2 quantity of radioactive material.

OAR 333-100-0005(7) "Agreement State" means any state with which the U.S. Nuclear Regulatory Commission or the U.S. Atomic Energy Commission has entered into an effective agreement under subsection 274b. of the Atomic Energy Act of 1954, as amended (73 Stat. 689). Non-agreement State means any other State.

(3) "Approved individual" means an individual whom the licensee has determined to be trustworthy and reliable for unescorted access in accordance with OAR 333-125-0020 through 333-125-0095 and who has completed the training required by OAR 333-125-0115.

(4) "Background investigation" means the investigation conducted by a licensee or applicant to support the determination of trustworthiness and reliability.

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

OAR 333-100-0005(17) "Becquerel" (Bq) means ~~the International System of Units (SI) unit of activity. One becquerel is equal to one~~ disintegration ~~or transformation~~ per second. ~~(dps or tps).~~

OAR 333-100-0005(20) "Byproduct material" means:

Formatted: Font: Not Italic, Underline

(a) Any radioactive material, except special nuclear material, yielded in, or made radioactive by, exposure to the radiation incident to the process of producing or utilizing special nuclear material; and

(b) The tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content, including discrete surface wastes resulting from uranium solution extraction process. Underground ore bodies depleted by such solution extraction operations do not constitute "byproduct material" within this definition.

(c) Any discrete source of radium-226 that is produced, extracted, or converted after extraction, before, on, or after August 8, 2005, for use for a commercial, medical, or research activity; or

(d) Any material that;

(A) Has been made radioactive by use of a particle accelerator; and

(B) Is produced, extracted, or converted after extraction, before, on, or after August 8, 2005, for use for a commercial, medical, or research activity; and

(C) Any discrete source of naturally occurring radioactive material, other than source material, that;

(D) The Nuclear Regulatory Commission, in consultation with the Administrator of the Environmental Protection Agency, the Secretary of Energy, the Secretary of Homeland Security, and the head of any other appropriate State and Federal agency, determines would pose a threat similar to the threat posed by a discrete source of radium-226 to the public health and safety or the common defense and security; and

(E) Before, on, or after August 8, 2005, is extracted or converted after extraction for use in a commercial, medical, or research activity.

Formatted: Space Before: 0 pt, After: 0 pt

Formatted: Normal, Space Before: Auto, After: Auto

OAR 333-118-0020(3) "Carrier" means a person engaged in the transportation of passengers or property by land or water as a common, contract, or private carrier, or by civil aircraft.

Formatted: Font color: Black

(56) "Category 1 quantity" means a quantity of radioactive material meeting or exceeding the category 1 threshold in Table one of Appendix A, Part 37. This is determined by calculating the ratio of the total activity of each radionuclide to the category 1 threshold for that radionuclide and adding the ratios together. If the sum is equal to or exceeds one, the quantity would be considered a category 1 quantity. Category 1 quantities of radioactive material do not include the radioactive material contained in any fuel assembly, subassembly, fuel rod, or fuel pellet.

(67) "Category 2 quantity" means a quantity of radioactive material meeting or exceeding the category 2 threshold but less than the category 1 threshold in Table 1 of Appendix A, Part 37. This is determined by calculating the ratio of the total activity of each radionuclide to the category 2 threshold for that radionuclide and adding the ratios together. If the sum is equal to or exceeds 1, the quantity would be considered a category 2 quantity. Category 2 quantities of radioactive material do not include the radioactive material contained in any fuel assembly, subassembly, fuel rod, or fuel pellet.

OAR 333-100-0005(31) "Curie" means a unit of quantity of radioactivity. One curie (Ci) is that quantity of radioactive material that decays at the rate of 3.7×10^{10} disintegrations or transformations per second (dps or tps). Means that amount of radioactive materials which disintegrates at the rate of 37 billion atoms per second.

(78) "Diversion" means the unauthorized movement of radioactive material subject to the physical protection program to a location different from the material's authorized destination inside or outside of the site at which the material is used or stored.

(89) "Escorted access" means accompaniment while in a security zone by an approved individual who maintains continuous direct visual surveillance at all times over an individual who is not approved for unescorted access.

(94) "Fingerprint orders" means the orders issued by the U.S. Nuclear Regulatory Commission or the legally binding requirements issued by Agreement States that require fingerprints and criminal history records checks for individuals with unescorted access to category 1 and category 2 quantities of radioactive material or safeguards information-modified handling.

OAR 333-100-0005(70) "License" means a license issued by the Authority in accordance with rules adopted by the Authority.

(104) "Local law enforcement agency (LLEA)" means a public or private organization that has been approved by a federal, state, or local government to carry firearms and make arrests, and is authorized and has the capability to provide an armed response in the jurisdiction where the licensed category 1 or category 2 quantity of radioactive material is used, stored, or transported.

(112) “Lost or missing licensed material” means licensed material whose location is unknown. It includes material that has been shipped but has not reached its destination and whose location cannot be readily traced in the transportation system.

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

(123) “Mobile device” means a piece of equipment containing licensed radioactive material that is either mounted on wheels or casters, or otherwise equipped for moving without a need for disassembly or dismounting; or designed to be hand carried. Mobile devices do not include stationary equipment installed in a fixed location.

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

(134) “Movement control center” means an operations center that is remote from transport activity and maintains position information on the movement of radioactive material, receives reports of attempted attacks or thefts, provides a means for reporting incidents to appropriate agencies and can request and coordinate appropriate aid.

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

(145) “No-later-than arrival time” means the date and time that the shipping licensee and receiving licensee have established as the time to initiate an investigation if the shipment has not arrived at the receiving facility. The no-later-than arrival time may not be more than six hours after the estimated arrival time for shipments of category 2 quantities of radioactive material.

(167) “Sabotage” means deliberate damage, with malevolent intent, to category 1 or 2 quantity of radioactive material, a device that contains a category 1 or 2 quantity of radioactive material, or the components of the security system.

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

(178) “Safe haven” means a readily recognizable and readily accessible site at which security is present or from which, in the event of an emergency, the transport crew can notify and wait for the local law enforcement authorities.

Formatted: Space Before: 0 pt, After: 0 pt

Formatted: Font: Not Italic

Formatted: Font: Not Italic

(189) “Security zone” means any temporary or permanent area determined and established by the licensee for the physical protection of category 1 or category 2 of radioactive material.

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

(192) “Telemetric position monitoring system” means a data transfer system that captures information by instrumentation and measuring devices about the location and status of a transport vehicle or package between the departure and destination locations.

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Space Before: 0 pt, After: 0 pt

(204) “Trustworthiness and reliability” means the characteristics of an individual considered dependable in judgment, character, and performance, such that unescorted access to category 1 or category 2 quantities of radioactive material by that individual does not constitute an unreasonable risk to the public health and safety or security. A determination of trustworthiness and reliability for this purpose is based upon the results from a background investigation.

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

(212) “Unescorted access” means solitary access to an aggregated category 1 or category 2 quantity of radioactive material or the devices that contain the material.

Specific Exemptions

Formatted: Font: Not Italic

(1) A licensee that possesses radioactive waste that contains category 1 or category 2 of radioactive material is exempt from the requirements of OAR 333-125-0020 through OAR 333-125-0190. Except that any radioactive waste that contains discrete sources, ion-exchange resins, or activated material that weights less than 2,000 kg (4,409 lbs) is not exempt from the requirements within this division.

Background Investigations and Access Control Program

333-125-0020 Part 37.21

Personnel Access Authorization Requirements for Category 1 and 2 Quantities

Part 37.21(a)

(1) Each licensee that possesses an aggregated quantity of radioactive materials at or above the category 2 threshold shall establish, implement, and maintain an access authorization program in accordance with OAR 333-125-0020 through 333-125-0095.

(2) An applicant for a new license and each licensee that would become newly subject to the requirements of OAR 333-125-0020 through 333-125-0095 prior to taking possession of an aggregated category 1 or category 2 of radioactive material.

(3) Any licensee that has not previously implemented the Security Orders or has been subject to the provisions of OAR 333-125-0020 through 333-125-0095 shall implement the provisions of those rules before aggregating radioactive material to a quantity that equals or exceeds the category 2 threshold.

Part 37.21(b)

(4) General performance objective. The licensee's access authorization program must ensure that the individuals specified in section (5) of this rule are trustworthy and reliable.

Part 37.21(c)

(5) Applicability. Licensees shall subject the following individuals to an access authorization program:

(a) Any individual whose assigned duties require unescorted access to category 1 or category 2 quantities of radioactive material or to any device that contains the radioactive material; and

(b) Reviewing officials.

(6) Licensees need not subject the categories of individuals listed in OAR 333-125-0085 subsections (1)(a) through (m) to the investigation elements of the access authorization program.

333-125-0025 Part 37.23

Access Authorization Program Requirements

Part 37.23(a)

(1) Granting unescorted access authorization. Licensees shall implement the following requirements under OAR 333-125-0020 through OAR 333-125-0095 for granting initial or reinstated unescorted access authorization.

(2) Individuals who have been determined to be trustworthy and reliable, shall complete the security training required by ~~listed in~~ OAR 333-125-0105 before being allowed unescorted access to category ~~one~~ or category ~~two~~ of radioactive material.

Part 37.23 (b)

(3) Reviewing officials shall be the only individuals who may make trustworthiness and reliability determinations that allow individuals to have unescorted access to category ~~one~~ or category ~~two~~ of radioactive material ~~possessed by the licensee.~~

(4) Each licensee shall name one or more individuals to be reviewing officials. After completing the background investigation on the reviewing official, the licensee shall provide under oath or affirmation, a certification that the reviewing official is deemed trustworthy and reliable by the licensee. The fingerprints of the named reviewing official must be taken by a law enforcement agency, Federal or State agencies that provide fingerprinting services to the public, or commercial fingerprinting services authorized by a State to take fingerprints. The licensee shall recertify that the reviewing official is deemed trustworthy and reliable every 10 years in accordance with OAR 333-125-0065.

Part 37.23(b)(3)

(5) Reviewing officials must be permitted to have unescorted access to category one or category two quantities of radioactive materials and access to the licensee's safeguards information or safeguards information-modified handling, if the licensee possesses safeguards information or safeguards information-modified handling.

(1) The reviewing official shall determine whether to permit, deny, unfavorably terminate, maintain, or administratively withdraw an individual's unescorted access authorization based on an evaluation of all of the information collected to meet the requirements within this division.

Formatted: Font: Not Italic

(2) The reviewing official may not permit any individual to have unescorted access until the reviewing official has evaluated all of the information collected to meet the requirements of this division and determined that the individual is trustworthy and reliable. The reviewing official may deny unescorted access to any individual based on information obtained at any time during the background investigation.

Formatted: Font: Not Italic

Formatted: Font: Not Italic

(3) The licensee shall document the basis for concluding whether or not there is reasonable assurance that an individual is trustworthy and reliable.

Formatted: Font: Not Italic

(4) The reviewing official may terminate or administratively withdraw an individual's unescorted access authorization based on information obtained after the background investigation has been completed and the individual had been granted unescorted access authorization.

Formatted: Font: Not Italic

(5) Licensees shall maintain a list of persons currently approved for unescorted access authorization. When a licensee determines that a person no longer requires unescorted access or has become ineligible to meet access authorization requirements, the licensee shall remove the person from the approved list as soon as possible, but no later than seven working days, and take prompt measures to ensure that the individual is unable to have unescorted access to the material.

Access Authorization Program Procedures

Formatted: Font: Not Italic

Licensees shall develop, implement, and maintain written procedures for implementing the access authorization program. The procedures must include provisions for the notification of individuals who are denied unescorted access. The procedures must include provisions for the review, at the request of the affected individual, of a denial or termination of unescorted access authorization. The procedures must contain a provision to ensure that the individual is informed of the grounds for the denial or termination of unescorted access authorization and allow the individual an opportunity to provide additional relevant information.

Right to Correct and Complete Information

Formatted: Font: Not Italic

(1) Prior to any final adverse determination, licensees shall provide each individual subject to this division with the right to complete, correct, and explain information obtained as a result of the licensee's background investigation. Confirmation of receipt by the individual of this notification must be maintained by the licensee for a period of one year from the date of the notification.

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

(2) If an individual reviewing their criminal history record believes that it is incorrect or incomplete in any respect and wishes to change, correct, update, or explain anything in the record, the individual may initiate challenge procedures.

Formatted: Font: Not Italic

(3) These procedures include direct application by the individual challenging the record to the law enforcement agency that contributed the questioned information or a direct challenge as to the accuracy or completeness of any entry on the criminal history record to the Federal Bureau of Investigation, Criminal Justice Information Services (CJIS) Division, ATTN: SCU, Mod. D-2, 1000 Custer Hollow Road, Clarksburg, WV 26306 as set forth in 28 CFR 16.30 through 16.34. In the latter case, the Federal Bureau of Investigation (FBI) will forward the challenge to the agency that submitted the data, and will request that the agency verify or correct the challenged entry. Upon receipt of an official communication directly from the agency that contributed the original information, the FBI Identification Division makes any changes necessary in accordance with the information supplied by that agency. Licensees must provide at least 10 days for an individual to initiate action to challenge the results of an FBI criminal history records check after the record being made available for his or her review. The licensee may make a final adverse determination based upon the criminal history records only after receipt of the FBI's confirmation or correction of the record.

Initial Investigation

(1) Before allowing an individual unescorted access to materials and devices containing category 1 or category 2 radioactive materials, licensees shall complete a background investigation of the individual seeking unescorted access authorization. The scope of the investigation must encompass at least the seven years preceding the date of the background investigation or since the individual's eighteenth birthday, whichever is shorter.

(2) The background investigation must include at a minimum:

(a) Fingerprinting and an FBI identification and criminal history records check in accordance with OAR 333-120-0075 through 333-125-0080;

(b) Verification of true identity. Licensees shall verify the true identity of the individual who is applying for unescorted access authorization to verify that the applicant is who he or she claims to be. A licensee shall review official identification documents such as driver's license; passport; government identification; certificate of birth issued by the state, province, or country of birth and compare the documents to personal information data provided by the individual to identify any discrepancy in the information.

(A) Licensees shall document the type, expiration, and identification number of the identification document, or maintain a photocopy of identifying documents on file in accordance with OAR 333-125-0090; and

(B) Licensees shall certify in writing that the identification was properly reviewed, and shall maintain the certification and all related documents for review upon inspection.

Formatted: Font: Not Italic

(c) Employment history verification. Licensees shall complete employment and military history verification. Licensees shall verify the individual's employment with each previous employer for the most recent seven years before the date of application;

Formatted: Font: Not Italic

(d) Verification of education. Licensees shall verify that the individual participated in the education process during the claimed period.

Formatted: Font: Not Italic

(e) Character and reputation determination. Licensees shall complete reference checks to determine the character and reputation of the individual who has applied for unescorted access authorization. Unless other references are not available, reference checks may not be conducted with any person who is known to be a close member of the individual's family, including but not limited to the individual's spouse, parents, siblings, or children, or any individual who resides in the individual's permanent household. Reference checks under this division must be limited to whether the individual has been and continues to be trustworthy and reliable.

Formatted: Font: Not Italic

(A) The licensee shall also, to the extent possible, obtain independent information to corroborate that provided by the individual such as seeking references not supplied by the individual; and

Requirements for Criminal History Records Checks of Individuals Granted Unescorted Access

Formatted: Font: Not Italic

Formatted: Font: Not Bold, Not Italic

Formatted: Font: Not Italic

(1) General Performance Objective and Requirements. Except for those individuals listed in OAR 333-125-0085 and those individuals grandfathered under OAR 333-125-0065, each licensee subject to the provision of this division shall fingerprint each individual who is to be permitted unescorted access to category 1 and category 2 quantities of radioactive material.

Formatted: Font: Not Italic, Not Highlight

Formatted: Font: Not Italic

Formatted: Font: Not Bold, Not Italic, Not Highlight

Formatted: Font: Not Italic

(2) Licensees shall transmit all collected fingerprints to the NRC for transmission to the FBI. The licensee shall use the information received from the FBI as part of the required

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

background investigation to determine whether to grant or deny unescorted access to category 1 or category 2 quantities of radioactive material for that individual.

Formatted: Font: Not Italic

(3) The licensee shall notify each affected individual that their fingerprints will be used to secure a review of their criminal history record, and shall inform the individual of the procedures for revising the record or adding explanations to the record.

Formatted: Font: Not Italic

(4) Fingerprinting is not required if a licensee is reinstating an individual's unescorted access if:

Formatted: Font: Not Italic

(a) The individual returns to the same facility that granted unescorted access authorization within 365 days of the termination of the individual's unescorted access authorization; and

Formatted: Font: Not Italic

(b) The previous access was terminated under favorable conditions.

Formatted: Font: Not Italic

(5) Fingerprints do not need to be taken if an individual who is an employee of a licensee, contractor, manufacturer, or supplier has been granted unescorted access to category 1 or category 2 radioactive material, access to safeguards information, or safeguards information-modified handling by another licensee, based upon a background investigation conducted under OAR 333-125-0020 through 333-125-0095 or the Nuclear Regulatory Commission's Fingerprint Orders or 10 CFR part 73. An existing criminal history check file may be transferred to another licensee who is conducting a criminal history check for an individual requesting unescorted access in accordance with OAR 333-125-0090(3).

Procedures for Processing of Fingerprint Checks

(1) For the purpose of complying with OAR 333-125-0020 through 333-125-0095, licensees shall submit to the U.S. Nuclear Regulatory Commission, Director, Division of Facilities and Security, 11545 Rockville Pike, ATTN: Criminal History Program/Mail Stop T-03B46M, Rockville, Maryland 20852, one completed, legible standard fingerprint card (Form FD-258, ORIMDNRCOOOZ), electronic fingerprint scan or, where practicable, other fingerprint record for each individual requiring unescorted access to category 1 or category 2 quantities of radioactive material. Copies of these forms may be obtained by writing the Office of Information Services, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, by calling 1-630- 829-9565, or by e-mail to FORMS.Resource@nrc.gov. Guidance on submitting electronic fingerprints can be found at <http://www.nrc.gov/site-help/e-submittals.html>.

(2) Fees for the processing of fingerprint checks are due upon application. Licensees shall submit payment with the application for the processing of fingerprints through corporate check, certified check, cashier's check, money order, or electronic payment, made payable to "U.S. NRC." (For guidance on making electronic payments, contact the Security Branch, Division of Facilities and Security at 301-415-7513. Combined payment for multiple applications is acceptable. The Commission publishes the amount of the fingerprint check application fee on the NRC's public Web site. (To find the current fee amount, go to the Electronic Submittals page at <http://www.nrc.gov/site-help/e-submittals.html> and see the link for the Criminal History Program under Electronic Submission Systems.)

(3) The Commission will forward to the submitting licensee all data received from the FBI as a result of the licensee's application(s) for criminal history records checks.

Physical Protection Requirements During Use

333-125-0100 Part 37.41(a) Compatibility B

Security Program

(1) Applicability: Each licensee that possesses an aggregated category 1 or category 2 quantity of radioactive material shall establish, implement, and maintain a security program in accordance with the requirements outlined in this rule through OAR 333-125-0155.

(a) An applicant for a new license and each licensee that would become newly subject to the requirements of OAR 333-125-0020 through 333-125-0095, upon application for modification of its license shall implement the requirements of OAR 333-125-0020 through 333-125-0095, as appropriate, before taking possession of an aggregated category 1 or category 2 quantity of radioactive material.

(b) Any licensee that has not previously implemented the Security Orders or been subject to the provisions OAR 333-125-0100 through 333-125-0155 shall provide written notification to the Authority at least 90 days before aggregating radioactive material to a quantity that equals or exceeds the category 2 threshold.

Part 37.41(b) Compatibility B

(2) General performance objective: Each licensee shall establish, implement, and maintain a security program that is designed to monitor and, without delay, detect, assess, and respond to an actual or attempted unauthorized access to category 1 or category 2 quantities of radioactive material.

Part 37.41(c) Compatibility C

(3) Program features: Each licensee's security program must include the program features, as appropriate, described in OAR 333-125-0105 through 333-125-0150.

333-125-0105 Part 37.43(a) Compatibility B

General Security Program Requirements

(1) Security plan. Each licensee identified in OAR 333-125-0100(1) shall develop a written security plan specific to its facilities and operations. The purpose of the security plan is to establish the licensee's overall security strategy to ensure the integrated and effective functioning of the security program required by this division. The security plan must, at a minimum:

(a) Describe the measures and strategies used to implement the requirements of OAR 333-125-0100 through 333-125-0155; and

(b) Identify the security resources, equipment, and technology used to satisfy the requirements of this division.

(2) The security plan must be reviewed and approved by the individual with overall responsibility for the security program.

(3) A licensee shall revise its security plan as necessary to ensure the effective implementation of the Authority's requirements. The licensee shall ensure that:

(a) The revision has been reviewed and approved by the individual with overall responsibility for the security program; and

(b) The affected individuals are instructed on the revised plan before the changes are implemented.

(4) The licensee shall retain a copy of the current security plan as a record for three years after the security plan is no longer required. If any portion of the plan is superseded, the licensee shall retain the superseded material for three years after the record is superseded.

333-125-0115 Part 37.43(c)(1) – (c)(3) Compatibility B

Security Program Training

(1) Each licensee shall conduct training to ensure that those individuals implementing the security program possess and maintain the knowledge, skills, and abilities to carry out their assigned duties and responsibilities effectively. The training must include instruction in:

(a) The licensee's security program and procedures to secure category 1 or category 2 quantities of radioactive material, and in the purposes and functions of the security measures employed;

(b) The responsibility to report promptly to the licensee any condition that causes or may cause a violation of Authority's requirements;

(c) The responsibility of the licensee to report promptly to the local law enforcement agency and licensee any actual or attempted theft, sabotage, or diversion of category 1 or category 2 quantities of radioactive material; and

(d) The appropriate response to security alarms.

(2) In determining those individuals who shall be trained on the security program, the licensee shall consider each individual's assigned activities during authorized use and response to potential situations involving actual or attempted theft, diversion, or sabotage of category 1 or category 2 quantities of radioactive material. The extent of the training must be commensurate with the individual's potential involvement in the security of category 1 or category 2 quantities of radioactive material.

(3) Refresher training must be provided at a frequency not to exceed 12 months and when significant changes have been made to the security program. This training must include:

(a) Review of the training requirements in section (1) of this rule and any changes made to the security program since the last training;

(b) Reports on any relevant security issues, problems, and lessons learned;

(c) Relevant results of NRC inspections; and

Security Program, Protection of Information

Formatted ... [80]

(1) Except as provided in section (9) of this rule, licensees authorized to possess category 1 or category 2 quantities of radioactive material shall secure from public disclosure and limit access to their security and implementation plans, and the list of individuals that have been approved for unescorted access.

Formatted: Font: 12 pt, Not Italic, No underline, Font color: Auto

Formatted: Font: 12 pt, Bold

Formatted ... [81]

(2) Efforts to limit access shall include the development, implementation, and maintenance of written policies and procedures for controlling access to, and for proper handling and protection against unauthorized disclosure of the security and implementation plans.

Formatted: Font: 12 pt

Formatted ... [82]

(3) Before granting an individual access to the security plan or implementation plans, the licensee shall:

Formatted ... [83]

(a) Evaluate an individual's need to know of the security or implementation plans; and

Formatted ... [84]

(b) If the individual has not been authorized for unescorted access to category 1 or category 2 quantities of radioactive material, safeguards information, or safeguards information-modified handling, the licensee must complete a background investigation to determine the individual's trustworthiness and reliability. A trustworthiness and reliability determination shall be conducted by the reviewing official and shall include the background investigation elements contained in OAR 333-125-0060(2)(b) through (2)(f).

Formatted: Font: 12 pt, Not Italic, No underline, Font color: Auto

Formatted ... [85]

(4) Licensees need not subject the following individuals to the background investigation elements for protection of information:

Formatted ... [86]

(a) The categories of individuals listed in OAR 333-125-0085(1)(a) through (m); or

Formatted ... [87]

(b) Security service provider employees, provided written verification that the employee has been determined to be trustworthy and reliable, by the required background

Local Law Enforcement Agency Coordination (LLEA)

Formatted ... [96]

(1) A licensee subject to OAR 333-125-0100 through 333-125-0155 shall coordinate, to the extent practicable, with a LLEA for responding to threats to the licensee's facility, including any necessary armed response. The information provided to the LLEA must include:

Formatted: Font: Bold, Not Italic, No underline, Font color: Red

Formatted: Font: Bold, Font color: Red

Formatted: Font: 12 pt, Not Italic, No underline, Font color: Auto

Formatted: Line spacing: single

(a) A description of the facilities and the category 1 and category 2 quantities of radioactive materials along with a description of the licensee's security measures that have been implemented to comply with OAR 333-125-0100 through 333-125-0155; and

Formatted ... [97]

Formatted ... [98]

(b) A notification that the licensee will request a timely armed response by the LLEA to any actual or attempted theft, sabotage, or diversion of category 1 or category two quantities of material.

Formatted ... [99]

(2) The licensee shall notify the Authority and the NRC regional office at U.S. Nuclear Regulatory Commission, Region IV, Division of Nuclear Materials Safety, 1600 E. Lamar Blvd., Arlington, TX 76011-4511; where email is appropriate, it shall be addressed to RidsRgn4MailCenter.Resource@nrc.gov within three business days if:

(a) The LLEA has not responded to the request for coordination within 60 days of the coordination request; or

(b) The LLEA notifies the licensee that the LLEA does not plan to participate in coordination activities.

Part 37.45(c) Compatibility C

(3) The licensee shall document its efforts to coordinate with the LLEA. The documentation must be kept for three years.

Part 37.45(d) Compatibility B

(4) The licensee shall coordinate with the LLEA at least every 12 months, or when changes to the facility design or operation adversely affect the potential vulnerability of the licensee's material to theft, sabotage, or diversion.

Security Zones

(1) Licensees shall ensure that all aggregated category 1 and category 2 quantities of radioactive material are used or stored within licensee-established security zones. Security zones may be permanent or temporary.

(2) Temporary security zones must be established as necessary to meet the licensee's transitory or intermittent business activities, such as periods of maintenance, source delivery, and source replacement.

(3) Security zones must, at a minimum, allow unescorted access only to approved individuals through:

(a) Isolation of category 1 and category 2 quantities of radioactive materials by the use of continuous physical barriers that allow access to the security zone only through established access control points. A physical barrier is a natural or man-made structure or formation sufficient for the isolation of the category 1 or category 2 quantities of radioactive material within a security zone; or

333-125-0135 Part 37.49(a) Compatibility B.

Monitoring, Detection, and Assessment.

(1) Monitoring and detection. Licensees shall establish and maintain the capability to continuously monitor and detect without delay all unauthorized entries into its security zones. Licensees shall provide the means to maintain continuous monitoring and detection capability in the event of a loss of the primary power source, or provide for an alarm and response in the event of a loss of this capability to continuously monitor and detect unauthorized entries.

(2) Monitoring and detection must be performed by:

(a) A monitored intrusion detection system that is linked to an onsite or offsite central monitoring facility; or

(b) Electronic devices for intrusion detection alarms that will alert nearby facility personnel; or

(c) A monitored video surveillance system; or

(d) Direct visual surveillance by approved individuals located within the security zone; or

(e) Direct visual surveillance by a licensee designated individual located outside the security zone.

(f) A licensee subject to OAR 333-125-0100 through 333-125-0155 shall also have a means to detect unauthorized removal of the radioactive material from the security zone. This detection capability must provide:

(A) For category 1 quantities of radioactive material, immediate detection of any attempted unauthorized removal of the radioactive material from the security zone. Such immediate detection capability must be provided by:

(i) Electronic sensors linked to an alarm; or

(ii) Continuous monitored video surveillance; or

(iii) Direct visual surveillance.

(g) For category 2 quantities of radioactive material, weekly verification through physical checks, tamper indicating devices, use, or other means to ensure that the radioactive material is present.

Part 37.49(b) Compatibility B

(2) Assessment. Licensees shall immediately assess each actual or attempted unauthorized entry into the security zone to determine whether the unauthorized access was an actual or attempted theft, sabotage, or diversion.

Part 34.49(c) Compatibility B

(3) Personnel communications and data transmission. For personnel and automated or electronic systems supporting the licensee's monitoring, detection, and assessment systems, licensees shall:

(a) Maintain continuous capability for personnel communication and electronic data transmission and processing among site security systems; and

(b) Provide an alternative communication capability for personnel, and an alternative data transmission and processing capability, in the event of a loss of the primary means of communication or data transmission and processing. Alternative communications and data transmission systems may not be subject to the same failure modes as the primary systems.

Part 37.49(d) Compatibility B

(4) Response. Licensees shall immediately respond to any actual or attempted unauthorized access to the security zones, or actual or attempted theft, sabotage, or diversion of category 1 or category 2 quantities of radioactive material at licensee facilities or temporary job sites. For any unauthorized access involving an actual or attempted theft, sabotage, or diversion of category one or category two quantities of

Maintenance and Testing

(1) Each licensee subject to OAR 333-125-0100 through 333-125-0155 shall implement a maintenance and testing program to ensure that intrusion alarms, associated communication systems, and other physical components of the systems used to secure or detect unauthorized access to radioactive material are maintained in operable condition and are capable of performing their intended function when needed. The equipment relied on to meet the security requirements of this part must be inspected and tested for operability and performance at the manufacturer's suggested frequency. If there is no manufacturer's suggested frequency, the testing must be performed at least annually not to exceed 12 months.

Formatted: Line spacing: single

(2) The licensee shall maintain records on the maintenance and testing activities for three years.

Security Program Review

(1) Each licensee shall be responsible for the continuing effectiveness of the security program. Each licensee shall ensure that the security program is reviewed to confirm compliance with the requirements of this division and that comprehensive actions are taken to correct any noncompliance that is identified. The review must include the radioactive material security program content and implementation. Each licensee shall periodically (at least annually) review the security program content and implementation procedures.

Formatted: Line spacing: single

(2) The results of the review, along with any recommendations, must be documented. Each review report must identify conditions that are adverse to the proper performance of the security program, the cause of the condition(s), and, when appropriate, recommend corrective actions, and corrective actions taken. The licensee shall review the findings and take any additional corrective actions necessary to preclude repetition of the condition, including reassessment of the deficient areas where indicated.

(3) The licensee shall maintain the review documentation for three years.

Reporting of Events

(1) The licensee shall immediately notify the LLEA after determining that an unauthorized entry resulted in an actual or attempted theft, sabotage, or diversion of a category 1 or category 2 quantity of radioactive material. As soon as possible after initiating a response, but not at the expense of causing delay or interfering with the LLEA response to the event, the licensee shall notify the Authority (971-673-0490). In no case shall the notification to the Authority be later than four hours after the discovery of any attempted or actual theft, sabotage, or diversion.

Formatted: Line spacing: single

(2) The licensee shall assess any suspicious activity related to possible theft, sabotage, or diversion of category 1 or category 2 quantities of radioactive material and notify the LLEA as appropriate. As soon as possible but not later than 4 hours after notifying the LLEA, the licensee shall notify the Authority (971-673-0490).

Formatted: Space After: 0 pt, Line spacing: single

(3) The initial telephonic notification required by section (1) of this rule must be followed within a period of 30 days by a written report submitted to the Authority. The report must include sufficient information for Authority analysis and evaluation, including identification of any necessary corrective actions to prevent future instances.

Physical Protection in Transit

333-125-0165 Part 37.71(a)-(c) Compatibility B

Additional Requirements for Transfer of Category 1 and Category 2 Quantities of Radioactive material.

(1) A licensee transferring a category 1 or category 2 quantity of radioactive material to a licensee of the Commission or an Agreement State shall meet the license verification provisions listed below instead of those listed in OAR 333-102-0330(4).

(a) Any licensee transferring category 1 quantities of radioactive material to a licensee of the Commission or an Agreement State, prior to conducting such transfer, shall verify with the NRC's license verification system or the license issuing authority that the transferee's license authorizes the receipt of the type, form, and quantity of radioactive material to be transferred and that the licensee is authorized to receive radioactive material at the location requested for delivery. If the verification is conducted by contacting the license issuing authority, the transferor shall document the verification. For transfers within the same organization, the licensee does not need to verify the transfer.

(b) Any licensee transferring category 2 quantities of radioactive material to a licensee of the Commission or an Agreement State, prior to conducting such transfer, shall verify with the NRC's license verification system or the license issuing authority that the transferee's license authorizes the receipt of the type, form, and quantity of radioactive material to be transferred. If the verification is conducted by contacting the license issuing authority, the transferor shall document the verification. For transfers within the same organization, the licensee does not need to verify the transfer.

(c) In an emergency where the licensee cannot reach the license issuing authority and the license verification system is nonfunctional, the licensee may accept a written certification by the transferee that it is authorized by license to receive the type, form, and quantity of radioactive material to be transferred. The certification must include the license number, current revision number, issuing agency, expiration date, and for a category 1 shipment the authorized address. The licensee shall keep a copy of the certification. The certification must be confirmed by use of the NRC's license verification system or by contacting the license issuing authority by the end of the next business day.

Part 37.71(d) Compatibility C

(2) The transferor shall keep a copy of the verification documentation as a record for three years.

Preplanning and Coordination of Shipment of Category One or Category Two Quantities of Radioactive Material

(1) Each licensee that plans to transport, or deliver to a carrier for transport, licensed material that is a category 1 quantity of radioactive material outside the confines of the licensee's facility or other place of use or storage shall:

(a) Preplan and coordinate shipment arrival and departure times with the receiving licensee;

(b) Preplan and coordinate shipment information with the governor or the governor's designee of any State through which the shipment will pass to:

(A) Discuss the State's intention to provide law enforcement escorts; and

(B) Identify safe havens; and

(C) Document the preplanning and coordination activities.

(2) Each licensee that plans to transport, or deliver to a carrier for transport, licensed material that is a category 2 quantity of radioactive material outside the confines of the licensee's facility or other place of use or storage shall coordinate the shipment no-later-than arrival time and the expected shipment arrival with the receiving licensee. The licensee shall document the coordination activities.

(3) Each licensee who receives a shipment of a category 2 quantity of radioactive material shall confirm receipt of the shipment with the originator. If the shipment has not arrived by the no-later-than arrival time, the receiving licensee shall notify the originator.

333-125-0180 Part 37.77(a) – (d) Compatibility B

Advance Notification of Shipment of Category 1 Quantities of Radioactive Material

(1) As specified in sections (1) and (2) of this rule, each licensee shall provide advance notification to the NRC and the governor of a State, or the governor's designee, of the shipment of licensed material in a category one quantity, through or across the boundary of the State, before the transport, or delivery to a carrier for transport of the licensed material outside the confines of the licensee's facility or other place of use or storage.

(a) Procedures for submitting advance notification. The notification must be made to the NRC and to the office of each appropriate governor or governor's designee. The contact information, including telephone and mailing addresses, of governors and governors' designees, is available on the NRC's Web site at <http://nrc-stp.ornl.gov/special/designee.pdf>. A list of the contact information is also available upon request from the Director, Division of Intergovernmental Liaison and Rulemaking, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Notifications to the NRC must be to the NRC's Director, Division of Security Policy, Office of Nuclear Security and Incident Response, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. The notification to the NRC may be made by e-mail to RAMOC_SHIPMENTS@nrc.gov, or by fax to 301-816-5151.

(b) A notification delivered by mail must be postmarked at least seven days before transport of the shipment commences at the shipping facility.

(c) A notification delivered by any means other than mail must reach NRC at least four days before the transport of the shipment commences and must reach the office of the governor or the governor's designee at least four days before transport of a shipment within or through the State.

(2) Information to be furnished in advance notification of shipment. Each advance notification of shipment of category 1 quantities of radioactive material must contain the following information, if available at the time of notification:

(a) The name, address, and telephone number of the shipper, carrier, and receiver of the category one radioactive material.

(b) The license numbers of the shipper and receiver.

(c) A description of the radioactive material contained in the shipment, including the radionuclides and quantity.

(d) The point of origin of the shipment and the estimated time and date that shipment will commence.

(e) The estimated time and date that the shipment is expected to enter each State along the route.

(f) The estimated time and date of arrival of the shipment at the destination; and

(g) A point of contact, with a telephone number, for current shipment information.

(3) Revision notice. The licensee shall provide any information not previously available at the time of the initial notification, as soon as the information becomes available but not later than commencement of the shipment, to the governor of the State or the governor's designee and to the NRC's Director of Nuclear Security, Office of Nuclear Security and Incident Response, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

(a) A licensee shall promptly notify the governor of the State or the governor's designee of any changes to the information provided in accordance with sections (2) and (3) of this rule. The licensee shall also immediately notify the NRC's Director, Division of Security Policy, Office of Nuclear Security and Incident Response, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001 of any such changes.

(4) Cancellation notice. Each licensee who cancels a shipment for which advance notification has been sent shall send a cancellation notice to the governor of each State or to the governor's designee previously notified and to the NRC's Director, Division of Security Policy, Office of Nuclear Security and Incident Response, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. The licensee shall send the cancellation notice before the shipment would have commenced or as soon thereafter as possible. The licensee shall state in the notice that it is a cancellation and identify the advance notification that is being cancelled.

OAR 333-125-0185 Part 37.79(a) Compatibility B

Requirements for Physical Protection of Category 1 and Category 2 Quantities of Radioactive Material During Shipment

(1) Shipments by road. Each licensee who transports, or delivers to a carrier for transport, in a single shipment, a category 1 quantity of radioactive material shall:

Formatted: Line spacing: single

Formatted: Font: 12 pt

Formatted: Font: 12 pt, No underline, Font color: Auto

(a) Ensure that movement control centers are established that maintain position information from a remote location. These control centers must monitor shipments 24 hours a day, seven days a week, and have the ability to communicate immediately, in an emergency, with the appropriate law enforcement agencies.

Formatted: Font: 12 pt, Not Italic, No underline, Font color: Auto

Formatted: Font: 12 pt, No underline, Font color: Auto

(b) Ensure that redundant communications are established that allow the transport to contact the escort vehicle (when used) and movement control center at all times. Redundant communications may not be subject to the same interference factors as the primary communication.

Formatted: Font: 12 pt, No underline, Font color: Auto

Formatted: Font: 12 pt

Formatted: Font: 12 pt, No underline, Font color: Auto

(c) Ensure that shipments are continuously and actively monitored by a telemetric position monitoring system or an alternative tracking system reporting to a movement control center. A movement control center must provide positive confirmation of the location, status, and control over the shipment. The movement control center must be prepared to promptly implement preplanned procedures in response to deviations from the authorized route or a notification of actual, attempted, or suspicious activities related to the theft, loss, or diversion of a shipment. These procedures will include, but not be limited to, the identification of and contact information for the appropriate LLEA along the shipment route.

Formatted: Font: 12 pt

Formatted: Font: 12 pt, No underline, Font color: Auto

Formatted: Font: 12 pt

Formatted: Font: 12 pt, No underline, Font color: Auto

(d) Provide an individual to accompany the driver for those highway shipments with a driving time period greater than the maximum number of allowable hours of service in a 24-hour duty day as established by the Department of Transportation Federal Motor Carrier Safety Administration. The accompanying individual may be another driver.

Formatted: Font: 12 pt, No underline, Font color: Auto

Formatted: Font: 12 pt

Formatted: Font: 12 pt, No underline, Font color: Auto

(e) Develop written normal and contingency procedures to address:

Formatted: Indent: First line: 0", Line spacing: single

Formatted: Font: 12 pt

(A) Notifications to the communication center and law enforcement agencies;

(B) Communication protocols. Communication protocols must include a strategy for the use of authentication codes and duress codes and provisions for refueling or other stops, detours, and locations where communication is expected to be temporarily lost;

(C) Loss of communications; and

(D) Responses to an actual or attempted theft or diversion of a shipment.

(f) Each licensee who makes arrangements for the shipment of category 1 quantities of radioactive material shall ensure that drivers, accompanying personnel, and movement control center personnel have access to the normal and contingency procedures.

(A) Each licensee that transports category 2 quantities of radioactive material shall maintain constant control and surveillance during transit and have the capability for immediate communication to summon appropriate response or assistance.

(B) Each licensee who delivers to a carrier for transport, in a single shipment, a category 2 quantity of radioactive material shall:

(i) Use carriers that have established package tracking systems. An established package tracking system is a documented, proven, and reliable system routinely used to transport objects of value. In order for a package tracking system to maintain constant control and surveillance, the package tracking system must allow the shipper or transporter to identify when and where the package was last and when it should arrive at the next point of control.

(ii) Use carriers that maintain constant control and surveillance during transit and have the capability for immediate communication to summon appropriate response or assistance; and

(iii) Use carriers that have established tracking systems that require an authorized signature prior to releasing the package for delivery or return.

Part 37.79(b) Compatibility B

(2) Shipments by rail. Each licensee who transports, or delivers to a carrier for transport, in a single shipment, a category 1 quantity of radioactive material shall:

(a) Ensure that rail shipments are monitored by a telemetric position monitoring system or an alternative tracking system reporting to the licensee, third-party, or railroad communications center. The communications center shall provide positive confirmation of the location of the shipment and its status. The communications center shall implement preplanned procedures in response to deviations from the authorized route or to a notification of actual, attempted, or suspicious activities related to the theft or

Form of records.

Formatted: Font: 12 pt, No underline, Font color: Auto

Formatted: Font: 12 pt

Each record required by this rule must be legible throughout the retention period. The record may be the original or a reproduced copy or a microform, provided that the copy or microform is authenticated by authorized personnel and that the microform is capable of producing a clear copy throughout the required retention period. The record may also be stored in electronic media with the capability for producing legible, accurate, and complete records during the required retention period. Records such as letters, drawings, and specifications, must include all pertinent information such as stamps, initials, and signatures. The licensee shall maintain adequate safeguards against tampering with and loss of records.

Record Retention

Formatted: Font: 12 pt, Not Italic, No underline, Font color: Auto

Licensees shall maintain the records specified by the administrative rule. If a retention period is not otherwise specified, these records must be retained until the Authority terminates the facility's license. All records related to this rule shall may be destroyed upon the licensee's termination.

Advance Notification of Transport of Nuclear Waste

(1) Nuclear waste transports shall be transported as specified in 10 CFR Part 71.97.

(2) Each licensee shall provide advance notification to the Governor of the State of Oregon or designee of the shipment of licensed material through or across the boundary of the state before the transport or delivery to a carrier for transport of licensed material outside the confines of the licensee's plant or other place of storage.

(3) Each licensee shall provide advance notification to the Tribal official of participating Tribes referenced in section (4) of this rule, or the official's designee, of the shipment of licensed material, within or across the boundary of the Tribe's reservation, before the transport, or delivery to a carrier, for transport, of licensed material outside the confines of the licensee's plant or other place of use or storage.

(4) A list of the mailing addresses of the governors and governors' designees is available upon request from the Director, Office of State, Local, and Indian Tribe Programs, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.
