RE: Amendment of NRC License #21-26792-01

Control # 586420

To whom it may concern,

We wish to provide the following additional information, in an effort to amend our NRC license.
Please find the enclosed Transfer of Control Information that you have requested.

If you have any questions, please contact our consultant James Botti by phone at 734-662-3197
Or by Email at jbotti@mpcphysics.com

Respectfully Yours,

Karen Leonhart
Executive Administrator

RECEIVED APR 04 2015

TRANSFER OF CONTROL
PER INFORMATION APPENDIX G, NUREG-1556, VOL. 9, REV. 9

1. NRC License # 21-26792-01
2. Current name: Allen Park Cardiology, P.C.
3. The new name will be: APC Physicians, PLLC
4. The license contact name is: Karen Leonhart at 313-928-4040

Transfer of stocks by sale will be made. APC Physicians, PLLC will obtain possession of all radioactive materials, sealed sources and radiation safety equipment for the following location:

6742 Park Avenue
Allen Park, MI 48101

5. All currently approved users for the licensee will remain without change. The Radiation Safety Officer for this license will be S Yellayi, MD.
6. Allen Park Cardiology, P.C. will no longer operate once the transfer is complete. All activities will be under APC Physicians, PLLC.
7. All required records regarding the use and possession of licensed materials will be current at the time of the transfer. The status of compliance will be maintained before, during and after the merger. All of these records are maintained on site. NO records regarding licensed material will be removed from the licensed site.
8. All required documents and records are currently kept in accordance with the NRC license conditions. These include, but are not limited to the annual calibration of survey instruments, semi-annual leak testing of non-exempt sealed radioactive sources, radiation monitoring and personnel exposure monitoring reports. Radiation monitoring is performed as required by the NRC licensee on a daily basis for acceptable radiation levels and weekly for removable contamination.

9. We confirm the areas of storage, preparation, handling, and administration of radioactive materials are surveyed daily for acceptable radiation levels and weekly for removable contamination. If contamination of these areas is detected during these daily or weekly surveys, decontamination is undertaken and completed at that time. The unsealed radio-nuclides in use at this location are all short-lived (i.e. half lives less than 65 days, most less than 10 days). Therefore, radioactive contamination is highly unlikely at this facility. If contamination were present, it would be discovered prior to the transfer. Record will be maintained on site of inventories of sealed sources and spills of radioactive materials.

10. **APC Physicians, PLLC** agrees to abide by all commitments and representations previously made to the NRC by **Allen Park Cardiology, P.C.**

11. **APC Physicians, PLLC** accepts full responsibility for the site. This facility is exempt from providing financial assurance for decommissioning because of the type of radioactive materials used (i.e. short-lived, unsealed sources in small quantities only). Routine radiation monitoring of the facility ensures that contamination will not be transferred during any subsequent change of ownership.

12. All parties involved with the transfer are aware and agree to the planned transfer of ownership.
