## **SECTION C - Description/Specifications**

### **Statement of Work**

#### **1. PROJECT TITLE**

Technical assistance for mixed oxide fuel fabrication facility application reviews.

#### **2. BACKGROUND**

The Office of Nuclear Material Safety and Safeguards (NMSS) is responsible for regulating activities which provide for the safe and secure production of nuclear fuel used in commercial nuclear reactors. Specially, NMSS develops, implements, and evaluates overall agency safety policy for fuel cycle and special nuclear material (SNM) facilities licensed under the Atomic Energy Act of 1954, as amended, or certified in accordance with the Energy Policy Act of 1992. The Division of Fuel Cycle Safety and Safeguards (FCSS) within NMSS, directs the U.S. Nuclear Regulatory Commission's (NRC) principal licensing, certification, inspection, environmental reviews, and other regulatory activities associated with these facilities to assure adequate safety and safeguards.

There are several fuel cycle facilities in possession of licenses issued by the NRC, or with an application under review, in pursuit of a license to operate. The Mixed Oxide (MOX) Fuel Fabrication Facility (MFFF) was issued a Construction Authorization in March 2005, for a location at the Savannah River Site in South Carolina. In December 2010, the NRC published its Final Safety Evaluation Report for the License Application to possess and use radioactive material at the Mixed Oxide Fuel Fabrication Facility. As MOX has begun to expand construction, there have been continuing technical and engineering issues requiring review.

#### **3. SCOPE OF WORK**

The contractor shall provide the personnel, materials, and facilities necessary to perform the work ordered by the NRC under the issuance of this task order. Specifically, the contractor shall prepare and provide Requests for Additional Information (RAI) to operations building submittal; review applicant responses to RAIs for adequacy; provide draft and final input for the Safety Evaluation Report (SER), and research and prepare documents needed by the NRC's Office of General Counsel staff for hearing briefs and other Atomic Safety Licensing Board (ASLB) submittals.
