

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

May 7, 2015

Mr. Robin DeLaBarre
Office of Nuclear Energy, Safety
& Security Affairs, Room 3320 HST
Bureau of International Security
& Nonproliferation
U.S. Department of State
2201 C Street, NW
Washington, DC 20520

Dear Mr. DeLaBarre:

Enclosed is an application (IW028/01), dated January 20, 2015, recently received by the U.S. Nuclear Regulatory Commission (NRC), from Oregon Specialty Metals, requesting Amendment No. 1 to import license IW028. The license presently authorizes the import of contaminated materials containing approximately 2.613 kilograms (kg) of U-235, in approximately 58.575 kg of uranium; generated by Mississauga Metals and Alloys in Ontario, Canada from processing the materials from U.S. fuel fabrication facilities.

The purpose of this amendment is to: 1) change the licensee point of contact, and 2) extend the date of expiration from June 1, 2015 to June 1, 2020.

Since no other changes to the terms and conditions of the existing license are requested, we intend to issue this minor amendment after the 30-day time period allotted for public review expires and it is determined that applicable export license criteria are met.

Sincerely,

A handwritten signature in black ink, appearing to read "Brooke G. Smith", is positioned above the typed name.

Brooke G. Smith, Chief
Export Controls and Nonproliferation Branch
Office of International Programs

Enclosure:
Application Dated 01/20/15
