clerk@psc.state.fl.us

April 15, 2015

RE: NRC report number NUREG-2176 Dear Sir or Madam:

My name is Linda Koenigsberg and I am a resident of the Miami Roads neighborhood through which FP&L plans to place its oversized dangerous high voltage lines or I am a right minded individual who actively objects to the placement of these lines. I also have lived in Miami all my life.

My objection is based on the following:

1. The integrity of drinking water for the south Florida area is at stake. The water that FP&L would use to cool its power plants would affect the level of saltwater intrusion into the Biscayne Aquifer, the main source of drinking water for this area. FP&L also plans to curtail its current monitoring program for this, which is totally unacceptable.
2. Our area may need more electricity, but there is no present or foreseeable crisis that exists. Therefore, a better thought out and ecologically sensitive plan for electricity should be on the drawing boards for our area including, but not limited to: solar, wind, water currents, etc.
3. There are other sites where high voltage poles can be placed that would cause less impact than placement so close to such a historically significant neighborhood as the Miami Roads neighborhood.
4. The placement of these poles and lines are not even in sync with the presently existing criteria governing their building or placement.
5. I am concerned about the hazards of 100 foot high electric poles that are within 50 feet of our homes and, in a hurricane or tornado could cause massive damage, including toppling onto rooftops and causing fires.
6. I am concerned as well about the health and well-being of individuals, including children who live close to the lines as I believe that there is the potential of cancer from these high voltage power lines. Whether you believe that there is or is not such danger, it has not yet been sufficiently negated by any study that I have read, and you should err towards caution as opposed to err towards risk. Also, the people who traverse the area regularly (as there is a bike path/walking path adjacent to SW 1st Avenue) would also be placed at risk.
7. I am also concerned about the loss of value of our homes due the close proximity of these lines through our neighborhood.
8. Should the lines be placed in the neighborhood, they should be buried underground to a level that will not pose a hazard to the neighborhood or those traversing the area.

Please do not confirm FP&L's request to build new nuclear reactors and certainly do not allow placement of these huge high voltage lines in the Miami Roads neighborhood (nor in or adjacent to any other residential neighborhood).

Very truly yours,

Linda Koenigsberg

OBJECTION TO FP&L'S PLAN TO PLACE HUGE HIGH VOLTAGE LINES ON POLES

ON OR NEAR SW 1ST AVENUE IN THE "MIAMI ROADS" AREA

TO: Cindy Bladey, Chief, Rules, Announcements, and Directives Branch (RADB), Division of Administrative Services, Office of Administration, Mail Stop: OWFN-12-H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001 or <http://tinyurl.com/FPLComments>

Florida Public Service Commission, 2540 Shumard Oak Blvd., Tallahassee, FL 32399-0850
clerk@psc.state.fl.us

RE: NRC report number NUREG-2176 Dear Sir or Madam:

My name is NICOLAS CAULINEAU, and I am either a resident of the Miami Roads neighborhood through which FP&L plans to place its oversized dangerous high voltage lines or I am a right minded individual who actively objects to the placement of these lines.

My objection is based on the following:

1. The integrity of drinking water for the south Florida area is at stake. The water that FP&L would use to cool its power plants would affect the level of saltwater intrusion into the Biscayne Aquifer, the main source of drinking water for this area. FP&L also plans to curtail its current monitoring program for this, which is totally unacceptable.
2. Our area may need more electricity, but there is no present or foreseeable crisis that exists. Therefore, a better thought out and ecologically sensitive plan for electricity should be on the drawing boards for our area including, but not limited to: solar, wind, water currents, etc.
3. There are other sites where high voltage poles can be placed that would cause less impact than placement so close to such a historically significant neighborhood as the Miami Roads neighborhood.
4. The placement of these poles and lines are not even in sync with the presently existing criteria governing their building or placement.
5. I am concerned about the hazards of 100 foot high electric poles that are within 50 feet of our homes and, in a hurricane or tornado could cause massive damage, including toppling onto rooftops and causing fires.
6. I am concerned as well about the health and well being of individuals, including children who live close to the lines as I believe that there is the potential of cancer from these high voltage power lines. Whether you believe that there is or is not such danger, it has not yet been sufficiently negated by any study that I have read, and you should err towards caution as opposed to err towards risk. Also, the people who traverse the area regularly (as there is a bike path/walking path adjacent to SW 1st Avenue) would also be placed at risk.
7. I am also concerned about the loss of value of our homes due the close proximity of these lines through our neighborhood.
8. Should the lines be placed in the neighborhood, they should be buried underground to a level that will not pose a hazard to the neighborhood or those traversing the area.
9. Other: _____

Please do not confirm FP&L's request to build new nuclear reactors and certainly do not allow placement of these huge high voltage lines in the Miami Roads neighborhood (nor in or adjacent to any other residential neighborhood).

Very truly yours,

IN SUPPORT OF FPL

THE "ROADS" NEIGHBORHOOD NEWS

The Newsletter of the Miami Roads Neighborhood Civic Association Vol 76 April 2015

1. SELFISH. PEOPLE WANT THE BENEFITS, BUT LET SOMEONE ELSE CARRY THE BURDEN.
2. THIS FLYER DOESN'T REPRESENTS WHAT THE MAJORITY THINKS
3. INFO HERE IS ~~DANGEROUS~~ FP&L HIGH VOLTAGE LINES

INCOMPLETE SET TO BE PLACED IN OUR NEIGHBORHOOD (UNLESS) AND MISLEADING. YOU OBJECT NOW!!!!

4. GOOD OVERSIGHT IS A PLUS.

WE DON'T OBJECT!

Because FP&L is planning to construct 2 new nuclear reactor units at Turkey Point, **they are also planning to place miles of 100 foot oversized polls with high voltage lines through Miami-Dade County, including marching them through our Roads neighborhood on or close to SW 1st Avenue. THE TIME TO OBJECT AND VOICE YOUR CONCERN FOR THIS IS NOW BEFORE IT IS TOO LATE.**

SUPPORT

We are urging you to write to the Nuclear Regulatory Agency as suggested by Miami's City Attorney, whose office is also fighting this. **This is a huge safety issue for us.** Also, please appear and strenuously object at the 2 upcoming meetings. Please see below. *I HEARD CITY OF MIAMI'S ARGUMENT AND IT WAS PITIFUL.*

The U.S. Nuclear Regulatory Commission (NRC) recently released its draft Environmental Impact Statement, available online at: <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr2176/>.

The deadline to communicate your concerns to the NRC ends on **May 22, 2015**. The NRC will take these comments into account before it publishes the final Environmental Impact Statement. Send your objections either by mail or email to Cindy Bladey, whose address and email address is on the attached form letter, or go to <http://tinyurl.com/FPLComments> (click the "Comment Now" button). Comments should specify the report number NUREG-2176.

Also, Florida's Public Service Commission (the state agency charged with overseeing publicly regulated utilities) has reopened its Nuclear Cost Recovery docket for 2015 (docket no. 150009). This proceeding governs the amount of money FPL may recover before it constructs the two (2) nuclear reactor units and transmission lines. Send your comments to this agency by email or US mail to the Commission whose address and email address are on the form letter below.

You should be aware that the City of Miami and Miami-Dade County have petitioned for an administrative hearing concerning a Florida Department of Environmental Protection order that would terminate the current monitoring program for the Turkey Point power plant cooling canals that may very well affect the level of saltwater intrusion into the Biscayne Aquifer, the main source of drinking water for South Florida. *- MISLEADING STATEMENT*

WHAT DOES THIS REALLY MEAN?

Note that there are 2 public meetings scheduled for Wed, April 22, 2015 from 7:00-10:00 PM at FIU Stadium Club Room, 11200 SW 8 Street, Miami and on Thurs. April 23, 2015 from 1:00-4:00 PM and also from 7:00-10:00 PM at the Hampton Inn Suites, 2855 NE 9 Street, Reef Room, Homestead, Florida. **Please show up and voice your disapproval.**

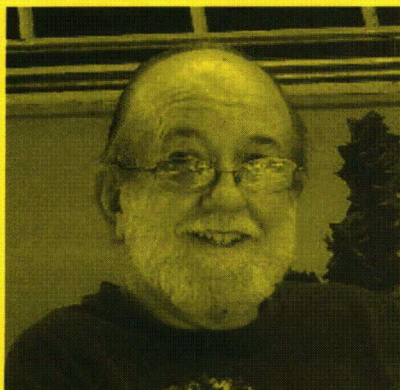

If you have any questions, contact City Attorney Victoria Mendez at vmendez@miamigov.com or 305-416-1800.

ENCLOSED IS A FORM LETTER FOR YOU TO SIGN AND SEND. SEND IT TO ANY OTHER INDIVIDUALS WHO YOU BELIEVE WOULD BE IN A POSITION TO ASSIST US. WE ALSO ASK YOU TO HAVE ALL OF YOUR FRIENDS AND NEIGHBORS (EVEN IF THEY DO NOT LIVE IN THE ROADS) SIGN THE LETTER AND FORWARD IT TO AT LEAST THE NRC AND THE FPSC BY THE DEADLINE DATES.

Joe Wilkins: Past President and Dear Friend to The Roads

We regret to inform you that Joe Wilkins, a dear friend and neighbor, passed away during the summer. Joe was a founding member of the Miami Roads Neighborhood Civic Association, a forceful historian and tireless activist and volunteer for the Roads and Miami in general, past president (and holder of other offices) on the Board of Directors of the MRNCA, and he was otherwise a great individual. Joe was always available to formulate ideas and put them into action for the betterment of our

community.

Joe was an awarded special education teacher for 30 years at Flagami Elementary. He had many passions; he was an avid reader who loved jazz, science, photography, cooking, and going to the University of Miami football and baseball games. He offered a warm and hardy "Howdy" to all as he sipped his morning coffee under a tree in his front yard.

Joe... you are missed!!!!

Our newsletters and other activities in which we are involved cost money which is well spent in order to represent **YOUR** interests. Please become a member or renew your membership now.

**Miami Roads Neighborhood Civic Association (MRNCA)
Membership Application**

PLEASE PRINT CLEARLY:

Name: _____

Address: _____

Phone: _____ E-Mail _____

Membership - \$30.00. Members receive notice of all association activities, events of importance to The Roads, and are eligible to vote at election time. You may also serve on the Board of Directors after being a member in good standing for one (1) year.

Please make checks payable to: **Miami Roads Neighborhood Civic Association or MRNCA.**

Return to: Lorraine Tucker, 218 SW 21 Road, Miami, Florida 33129 or bring to the next meeting.

For more information, please call: 305-285-0056 or e-mail: RoadsAssociation@aol.com

MARK YOUR CALENDAR:

MRNCA MEETINGS ARE HELD ON THE LAST WEDNESDAY OF EACH MONTH AT SIMPSON PARK!

ELECTIONS TO OUR BOARD OF DIRECTORS

ARE COMING SOON. WE WILL KEEP YOU ADVISED IF YOU ARE MEMBERS AND PROVIDE US WITH YOUR EMAIL ADDRESSES AND/OR PHONE NUMBERS

There are spots open on our Board of Directors. If you wish to run for one of those seats or wish to nominate one of your neighbors who is willing to serve, please **email** your **Name**, or that of the person you wish to nominate, together with the nominee's address, telephone number and **email address(es)** to **roadsassociation@aol.com**. There are **two** very important requirements in order to run for member of the Board:

- (1) Candidate must have been a member of the association for at least **ONE YEAR**, and
- (2) Candidate must **be up-to date in his/her membership dues**.

In the event you do not have access to a computer in order to send in your request for nomination, please fill out the below form and mail to Ms. Lorraine Tucker, 218 SW 21 Road, Miami, Florida 33129. Thanks

NOMINATION FOR BOARD MEMBER:

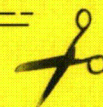

NAME: _____

ADDRESS: _____

PHONE #: _____

EMAIL: _____

This Member is a member in good standing in the MRNCA, has paid his/her dues, and has been a member of the Association for at least ONE Year.

OBJECTION TO FP&L'S PLAN TO PLACE HUGE HIGH VOLTAGE LINES ON POLES
ON OR NEAR SW 1ST AVENUE IN THE "MIAMI ROADS" AREA

TO: Cindy Bladey, Chief, Rules, Announcements, and Directives Branch (RADB), Division of Administrative Services, Office of Administration, Mail Stop: OWFN-12-H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001 or <http://tinyurl.com/FPLComments>

Florida Public Service Commission, 2540 Shumard Oak Blvd., Tallahassee, FL 32399-0850
clerk@psc.state.fl.us

RE: NRC report number NUREG-2176 Dear Sir or Madam:

My name is Glenn M Dean, and I am either a resident of the Miami Roads neighborhood through which FP&L plans to place its oversized dangerous high voltage lines or I am a right minded individual who actively objects to the placement of these lines.

My objection is based on the following:

1. The integrity of drinking water for the south Florida area is at stake. The water that FP&L would use to cool its power plants would affect the level of saltwater intrusion into the Biscayne Aquifer, the main source of drinking water for this area. FP&L also plans to curtail its current monitoring program for this, which is totally unacceptable.
2. Our area may need more electricity, but there is no present or foreseeable crisis that exists. Therefore, a better thought out and ecologically sensitive plan for electricity should be on the drawing boards for our area including, but not limited to: solar, wind, water currents, etc.
3. There are other sites where high voltage poles can be placed that would cause less impact than placement so close to such a historically significant neighborhood as the Miami Roads neighborhood.
4. The placement of these poles and lines are not even in sync with the presently existing criteria governing their building or placement.
5. I am concerned about the hazards of 100 foot high electric poles that are within 50 feet of our homes and, in a hurricane or tornado could cause massive damage, including toppling onto rooftops and causing fires.
6. I am concerned as well about the health and well being of individuals, including children who live close to the lines as I believe that there is the potential of cancer from these high voltage power lines. Whether you believe that there is or is not such danger, it has not yet been sufficiently negated by any study that I have read, and you should err towards caution as opposed to err towards risk. Also, the people who traverse the area regularly (as there is a bike path/walking path adjacent to SW 1st Avenue) would also be placed at risk.
7. I am also concerned about the loss of value of our homes due the close proximity of these lines through our neighborhood.
8. Should the lines be placed in the neighborhood, they should be buried underground to a level that will not pose a hazard to the neighborhood or those traversing the area.
9. Other:

Please do not confirm FP&L's request to build new nuclear reactors and certainly do not allow placement of these huge high-voltage lines in the Miami Roads neighborhood (nor in or adjacent to any other residential neighborhood).

Very truly yours,
