General Comment

I am out of the state otherwise I would've attended the Miami hearing. I oppose this plan. There is too much water being used to cool the reactors if there isn't enough treated wastewater available, which I also don't like. There are already too many interests competing for our limited water supply, and I'm not even taking about the ecosystem and wildlife that depend on water. I also don't like that the power lines would run through the Shark River Slough. There are power lines running north along 27. Let there be areas that are just wild. Please don't approve this short sighted plan.
