Dear Nuclear Regulatory Commission Officials,

I strongly oppose the construction of the two proposed Nuclear Power Reactors - 6 & 7- at Florida Power and Light's Turkey Point facility for the following reasons:

- Anyone reading the local paper here in Miami knows that FPL's recent problems concerning reactor cooling water temperatures do not bode well for the future of the existing plant and serve as a strong warning against future nuclear construction in this area.
- History (Fukushima, Three Mile Island, and Chernobyl) provides solid evidence that nuclear incidents devastate large areas and destroy lives.
- Turkey Point is adjacent to fragile natural resources and a 'stone's throw' from the densely populated areas of Miami-Dade County. Any 'major' incident would destroy our ecosystem and wreck havoc on the lives of more than two million people.

In short, please do not approve these reactors. Consider history, current conditions at Turkey Point, and the lives of the people of Miami-Dade County and the health of our ecosystem. Encourage Florida Power and Light to invest in renewable safe energy sources for the good of all.

Thank you.

Sincerely,
Roberta Neway
