Subject: Opposition to Construction of Nuclear Reactors at FP&L's Turkey Point facility.

Dear Ms.Bladey:

This letter is to inform you of my opposition to the construction of the two proposed Nuclear Power Reactors - 6 & 7- at Florida Power and Light's Turkey Point facility. I do this because of my concern for the future of my granddaughter and her generation which, if you have grandchildren or will someday, includes them also.

Recent history has demonstrated that accidents with both catastrophic and long-lasting results can and do occur at such facilities including the ones at Fukushima, Three Mile Island and Chernobyl.. FP&L's recent problems with the reactor cooling water temperatures only reinforces the fact that unanticipated problems and "incidents" remain a distinct possibility at Turkey Point. Given the proximity of Turkey Point to the major population centers of South Florida , its location immediately contiguous to the environmentally sensitive, fragile and irreplaceable, Florida Everglades, Everglades National Park, Biscayne National Park, and the Florida Keys Marine Sanctuary, the Turkey Point Nuclear Power Plant exposes the population and natural environment of South Florida to unintended, but nevertheless, extraordinary risk. For this reason alone I can not urge you more strongly to reject the application to build these Reactors.

In addition, as the world moves toward ecologically sound and renewable alternative power technologies , I believe it is essential that FP&L follow such established examples of viable and safe utility scale energy production. Times have changed and technologies have advanced since the inception of the Turkey Point facility. The changes and advancements in viable power generating technologies have been even more dramatic within the 9 years that FP&L has pursued this goal of expanding the nuclear facilities at Turkey Point. It is therefore unacceptable to me and I hope to you for FP&L to resist this change. It is in the interest of FP&L's shareholders, customers, the residents of Miami-Dade County, the residents of the State of Florida, and a healthier, safer world, to do so. I therefore plead with you to make FP&L abandon this ill-conceived plan to expand nuclear power generation at Turkey Point.

Respectfully,
Ira Horowitz
