Subject: Turkey Point Units 6 & 7

To whom it may concern:

Nuclear energy is good and I believe it is an important our past and future energy needs in America. In fact at Merrill Lynch in the early 1970's I help raise the original capital to build Turkey Point. That said what has been proposed for the expansion of the existing Turkey Point Facility is an egregious mistake. Card Sound is a small and shallow body of water in a warm environment. An expansion of the existing plant, which is already taxing our fragile environment would be devastating in the long term.

The only advantage would be to the shareholders and management by selling electricity to other parts of North America for profit at the expense of our local environment. If this expansion is approved I will sell all my FLP shares and encourage all those intuitions who hold shares to do the same.

Please reconsider.

Respectfully,

Christopher V. Streit
