Subject: Concerned South Florida Resident - Turkey Point Expansion

To whom it may concern,

I was born and raised in Miami and have remained a resident for 37 of my 41 years. I am owner of a construction consulting business and currently reside in Coral Gables. Recently I have read about plans for expansion of the Turkey Point Nuclear Power Plant. While I am normally not opposed to nuclear energy generation, I would like to know how the project's design engineers have addressed the concern of susceptibility to storm surge from a hurricane, so as to learn from and further prevent the existential threat posed by a repeat of the Fukushima Daiwa plant in our own back yard. I would also like to know how security concerns of a potential terrorist attack are being addressed in the expansion project plans as well as the current power plants in operation today. I am concerned that expansion may not be the solution.

Concerned,

Tom Mauri
