Subject: FPL nuclear plan

To Whom it May Concern-

Regarding FPL's proposed nuclear energy plan, What is there to say other than we, as a state, are currently ignoring just about every warning we've received from every scientist in the world telling us that in a matter of years, we will run out of fresh drinking water. We will be flooded. We will die.

This is not an over dramatization, it's simply true.

And yet, the only thing worse than doing NOTHING about our current problems is doing something that makes them HORRIBLY WORSE.

Teach us how to be better. Save our state. Don't allow corporations to place money over humanity.

Thank you

Becky Randel Manuel
