NRC Docket No. 50-461

Subject: Response to NRC Integrated Inspection Report and Preliminary White Finding

Reference: Letter from A. Boland (NRC) to B. Hanson (EGC), Clinton Power Station—NRC Integrated Inspection Report 05000461/2015001 and Preliminary White Finding, dated May 13, 2015

In the referenced letter, the NRC documented a finding concerning the failure of the Division 3 Shutdown Service Water (SX) system pump to perform its intended safety function which has been preliminarily determined to be a White finding with low to moderate safety significance. This finding is related to an event that occurred in September 2014.

The referenced letter requested verbal and written notification within 10 days of the date of the letter stating Exelon Generation Company, LLC's (EGC) intention to (1) request a Regulatory Conference to present to the NRC EGC's perspective on the facts and assumptions the NRC used to arrive at the finding and assess its significance, or (2) submit EGC's position on the finding to the NRC in writing. On May 22, 2015, Mr. Jeffrey Cunningham discussed with Mr. Michael Kunowski of the NRC EGC's request to attend a Regulatory Conference on this matter. This letter provides the written request to attend a Regulatory Conference. As requested in the referenced letter, EGC will submit supporting documentation at least one week prior to the Regulatory Conference.

If there are any questions or concerns regarding this request, please contact Mr. Jeffrey Cunningham, Regulatory Assurance Manager, at (217) 937-2800.

RECEIVED MAY 26 2015

Respectfully,

A handwritten signature in black ink, appearing to read 'M. Newcomer', with a horizontal line extending to the right.
