May 27, 2015

Symetrica, Inc.  
ATTN: Dr. Matthew Dallimore  
Radiation Safety Officer  
63 Great Road, Suite 106  
Maynard, MA 01754

SUBJECT: VOIDANCE OF LICENSE REQUEST; SYMETRICA, INCORPORATED;  
APPLICATION DATED MARCH 11, 2015

Dear Dr. Dallimore:

This letter refers to your application dated March 11, 2015, for a license to distribute exempt products in accordance with 10 CFR 32.14.

The NRC sent you a letter dated March 30, 2015, which requested that you provide additional information concerning your application within 30 calendar days of the date of the letter (i.e., by April 29, 2015). Via an email exchange, you were granted an extension until May 25, 2015 to provide the requested information. In an email dated May 22, 2015, you indicated that you will not be able to meet this deadline and as of the date of this letter, we have not received the requested information.

Because you were not able to provide the additional information required to complete the requested action within the stated time period, we have voided your application. This action is taken without prejudice to the resubmission of your request; therefore, your application will be re-opened once the NRC receives a complete response to our request for additional information. Please note that if the information requested in our letter dated March 30, 2015 is received by NRC more than 12 months after your original application was received, for the NRC to process your license application you will be required to pay an additional license fee as specified in 10 CFR 170.31, "Schedule of fees for materials licenses and other regulatory services, including inspections, and import and export licenses."

In accordance with 10 CFR 2.390 of NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in NRC's Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC web site at <http://www.nrc.gov/NRC/ADAMS/index.html> (the Public Electronic Reading Room).

M. Dallimore
