UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

June 11, 2015

Mr. K. Henderson
Site Vice President
Catawba Nuclear Station
Duke Energy Carolinas, LLC
4800 Concord Road
York, SC 29745

SUBJECT: CATAWBA NUCLEAR STATION, UNITS 1 AND 2 – TRANSMITTAL OF DAM
INSPECTION REPORT

Dear Mr. Henderson:

On March 31, 2015, a routine safety inspection was conducted of the Standby Nuclear Service Water Pond (SNSWP) Dam at the Catawba Nuclear Station. The staff of the U.S. Nuclear Regulatory Commission (NRC) has received and evaluated the final report from its technical assistance contractor, the Federal Energy Regulatory Commission (FERC), related to this inspection. The inspection did not identify any conditions that represent a threat to the safety or the operation of the SNSWP.

The NRC staff concurs with the conclusions stated in the enclosed FERC report. The inspection included the embankment, abutments, outlet structure, instrument pier, and the SNSWP visible from the dam. Based on visual inspection, discussions with licensee representatives, and data provided by Duke Energy Carolinas, LLC, the SNSWP embankment and appurtenances are adequately maintained and in satisfactory condition for service, stability, and longevity. No conditions threatening dam safety were found.

The information in the report is considered critical energy infrastructure information. Thus the Enclosure is considered sensitive security-related information, official use only, and is being withheld from public disclosure.

The Enclosure transmitted herewith contains sensitive unclassified non-safeguards information. When separated from the Enclosure, this transmittal document is DECONTROLLED.
