Subject: MET Data RAI #1
Attachments: Appendix S rev Apr 2015 Changes.pdf

Tom:

Letter dated November 19, 2014 stated that during NRC staff review of the MEA Technical Report it was identified that certain areas under the Meteorology Section needed additional information. Request for Additional Information (RAI) #1 requested the following:

Please provide the technical justification for analyzing the long-term data (Scottsbluff 15-year and Chadron 12-year) as the dependent variable (Y-axis) and the baseline 1-year data as the independent variable (X-axis). If appropriate justification cannot be provided, please provide all linear regression analyses with the long-term (15-year or 12-year) data as the independent variable and the 1-year baseline data as the dependent variable.

Attached is CBO's response to this request. The analyses used the long-term data as the independent variable (X-axis) and the 1-year data as the dependent variable (Y-axis). This response replaces the December 2014 submittal for Appendix S.
