Dear Mr. Pedro Salas:

By letter dated May 22, 2015 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML15149A157), AREVA Inc. submitted an approved ("-A") version of Topical Report (TR) EMF-92-116P-A, Revision 0, Supplement 1P, "Generic Mechanical Design Criteria for PWR Fuel Design," to the U.S. Nuclear Regulatory Commission (NRC) staff. AREVA Inc. has done so in accordance with our request to publish approved proprietary and non-proprietary versions of this TR, as detailed in the transmittal letter of the NRC staff's final safety evaluation (ADAMS Accession No. ML15009A336) for the original TR.

NRC staff verified that AREVA Inc. has met the requirements and determined that the submitted "-A" versions are acceptable for referencing in licensing applications for nuclear power plants to the extent specified and under the limitations delineated in the accepted versions of the TR. TR EMF-92-116P-A, Revision 0, Supplement 1P, "Generic Mechanical Design Criteria for PWR Fuel Design," is now approved for use in future licensing actions.

Please contact Jonathan G. Rowley of my staff at (301) 415-4053 if you have on questions on this subject.
